Purpose of Guidelines

These guidelines describe the parameters for distributing University of Maine System (UMS) operating investment earnings.

Parameters

The System Accounting Department will distribute earnings monthly based on the prior month’s Operating Fund money market rate of return. Distributions are contingent on positive money market performance results and will be made to certain funds whereby UMS has a contractual and/or legal obligation or has made an internal decision to do so.

Distributions will be made through the monthly allocation process to chartfield combinations with positive cash balances in the following fund codes:

<table>
<thead>
<tr>
<th>Fund Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>10</td>
<td>Designated - Gifts and endowment income programs only</td>
</tr>
<tr>
<td>20</td>
<td>Restricted - Expendable gifts and endowment income only (i.e., not grants)</td>
</tr>
<tr>
<td>20</td>
<td>Restricted - Certain grants for which the University received advance payments</td>
</tr>
<tr>
<td>22</td>
<td>UM Cooperative Forestry Research Unit (CFRU) gift only</td>
</tr>
<tr>
<td>25</td>
<td>Perkins Loan Fund</td>
</tr>
<tr>
<td>26</td>
<td>Nursing Loan Fund</td>
</tr>
<tr>
<td>27</td>
<td>University Loan Fund</td>
</tr>
<tr>
<td>50</td>
<td>Agency Funds</td>
</tr>
</tbody>
</table>

Earnings may be distributed for other areas when approved by the Vice Chancellor for Finance and Administration.

Who is Responsible

The Vice Chancellor for Finance and Administration will communicate with the Shared Services Advisory Council (SSAC) as appropriate about the distribution of investment
income. SSAC members will in turn communicate with their respective campus budget managers.

The System Accounting Department will distribute investment earnings to the applicable general ledger chart field combinations monthly.

Budget managers are responsible for managing their funds to ensure spending is within the available budget.

**GL Inquiry Attribute for Investment Earnings**

Each eligible general ledger program code has an attribute ‘TI_INCOME_DIST’ that shows the chartfield combination to which the earnings should be credited. In GL Inquiry you can see whether or not a program has this attribute by looking up and selecting the program and then clicking the Attribute Values link next to the program number. This attribute is listed along with the other attributes that a program code may carry.

**Definitions and Terms**

*Allocations* are an automated process that the University uses to create journal entries for various accounting activities and will be the process used to distribute operating investment earnings. A [General Ledger Monthly Closing Schedule](http://www.maine.edu/system/oft/actgschedule.php) provides a schedule of dates allocations are run each month. The monthly closing schedule is located on the University of Maine System webpage at [http://www.maine.edu/system/oft/actgschedule.php](http://www.maine.edu/system/oft/actgschedule.php).

*University of Maine System Operating Investments* include pooled monies from various sources like appropriations, student charges, grants and contracts, sales and services, and auxiliary operations, net of their uses. Operating Investments exclude:

- separately maintained bank accounts and endowments,
- assets of the managed investment pool (includes endowments and the UMS Other Post-Employment Benefits (OPEB) Trust),
- planned giving funds, and
- assets of the Defined Benefit Pension Plan.

The operating investments are invested in compliance with the Operating Funds Guidelines which may be found at [http://www.maine.edu/system/oft/InvestmentGuidelines.php](http://www.maine.edu/system/oft/InvestmentGuidelines.php). These guidelines are approved by the University of Maine System Investment Committee of the Board of Trustees.

While operating monies are pooled for investment purposes, those funds for which investment earnings will be distributed are considered to be invested solely in money market instruments held within the UMS Liquidity Pool. In this way, monies are liquid and capital will be preserved.
