ISIR 2C Process

Concept

The ISIR 2C process is used to assign checklists and/or communications to students whose ISIRs meet certain criteria. For example, the ISIR 2C process can be used to find all the students requiring verification, and assign to them the appropriate checklists and missing items letters.

The process can be used in other contexts, where the student selection criteria use other records besides the ISIR. For example, the process may be used to identify students who need to complete an entrance interview.
