

Query Mover

1.	Click the University of Maine System link. 
2.	Click the General Options link. 
3.	Click the Query Mover link
4.	Click the Look up Remote Database button. 
5.	Click an entry in the Database Name column to select the Remote Database containing the query you wish to copy. 
6.	Click the Look up Query Name button. 
7.	Click an entry in the Query Name column. Query selection includes operator's Private queries as well as all Public queries. Use "begins with" search box to shorten search results. 
8.	Click the Copy Query button. 
9.	A warning message will appear if the query selected already exists. Click the OK button to overwrite the existing query. 
10.	A Message Box confirms that the copy completed successfully. Click the OK button. 
11.	A link to Query Manager is available. Click the Query Manager link. 
12.	This is a link to the Local Database, not the Remote Database.
13.	End of Procedure.
