University of Maine System
Student Representatives to the Board of Trustees

Board Mentor Responsibilities (Draft)

1. One Board member would be assigned to each Student Rep from the day that the Student Rep was added to the Board. This Board member would be responsible for reaching out to that Student Rep to start a conversation, and help welcome them to the team. This normally gets done somewhat informally right now, it would be nice for the Student Rep to know that they have one Board Member that they can go to when needed. The Student Rep would also be encouraged to sit with that Board Member during the dinner portion of their first two-day meeting.

2. The Board Member that is assigned to each respective Student Rep will give a response to that Student Rep's Board Report. Right now they are read, but we never get any feedback on them. I’d like to see this changed, and this seems like the best way to spread out that work.

3. As far as anything else that comes from the relationship that will naturally develop, that is completely up to the Board Member, and how comfortable they are with supplying any more mentorship to the Student Rep than is required here.
