

Board of Trustees
Finance, Facilities & Technology Committee
August 23, 2023 at 9:00 am
Zoom Meeting – No Physical Location Available

The public is invited to view the meeting on YouTube. The link to the Board of Trustees YouTube page can be found the Board website: <https://www.maine.edu/board-of-trustees/>

AGENDA

- 9:00am – 9:05am Call the meeting to order and Roll Call
- 9:05am – 9:40am **EXECUTIVE SESSION**
The Finance, Facilities, & Technology Committee will enter Executive Session under the provision of: 1 MRSA Section 405 6-C
- 9:40am – 9:50am
TAB 1 Reimbursement Resolution, UM Factory of the Future
- ~~9:50am – 10:00am~~
~~**TAB 2** Campus Lighting Project Authorization under an Energy Savings Performance Contract, UM~~
Item Withdrawn
- 9:50am – 10:00am
TAB 3 University of Maine, Advanced Structures and Composite Center (ASCC), Secure Smart Textiles Laboratory Authorization Increase
- 10:00am – 10:10am
TAB 4 Dental Clinic Expansion, UMA
- 10:10am – 10:20am
TAB 5 Renewal of Allagash Wilderness Camp Land Lease, UMFK
- 10:20am – 10:30am
TAB 11 Deering Farmhouse Renovation Revenue Allocation, USM
- 10:30am – 10:50am
TAB 6 Review of IT Projects with a Value of \$250,000 or Greater
- 10:50am – 10:55am
TAB 7 Capital Project Status Report and Bond Projects Update, UMS
- 10:55am – 11:00am
TAB 8 FY2024 Finance, Facilities, & Technology (FFT) Committee Work Plan
- 11:00am – 11:30am
TAB 9 5 Year Capital Plan
- 11:30am – 12:00pm
TAB 10 Multi-Year Financial Analysis Presentation

Action items within the Committee purview are noted in green.

Items for Committee decisions and recommendations are noted in red.

Note: Times are estimated based upon the anticipated length for presentation or discussion of a particular topic. An item may be brought up earlier or the order of items changed for effective deliberation of matters before the Committee.

University of Maine System
Board of Trustees

AGENDA ITEM SUMMARY

NAME OF ITEM: Reimbursement Resolution, UM Factory of the Future

INITIATED BY: Roger J. Katz, Chair

BOARD INFORMATION:

BOARD ACTION: X

BOARD POLICY:

712 – Debt Policy

UNIFIED ACCREDITATION CONNECTION:

N/A

BACKGROUND:

The University of Maine System (UMS) acting through the University of Maine (UM) requests the Board to adopt the attached Resolution for Reimbursement of Project Expenditures in order to preserve flexibility for the reimbursement of costs incurred in connection with the construction of the Green Engineering and Materials (GEM) “Factory of the Future” with proceeds of future debt should the campus decide to seek financing for such costs.

On September 12, 2022, the Board approved authorization to expend up to \$13,800,000 in Maine Jobs & Recovery Act funds, in addition to the previously authorized \$1,500,000 campus reserves, for a total of \$15,300,000 to complete design for facility and equipment and ancillary pre-construction costs of the GEM Factory of the Future.

This project has mixed sources of funding, which are still being finalized, but which are expected to include University revenue bonds.

The resolution allows project expenditures for the GEM Factory of the Future made prior to bond issuance to be reimbursed with bond proceeds. It does not authorize the issuance of University revenue bonds for this purpose. The University will seek additional approval for the construction of the GEM “Factory of the Future” and the financing thereof at a future Board meeting.

TEXT OF PROPOSED RESOLUTION:

That the Finance, Facilities, and Technology Committee, approves the following resolution to be forwarded for Board of Trustee approval at the September 11, 2023, Board Meeting.

That the Board of Trustees accepts the recommendation of the Finance, Facilities, & Technology Committee and approves the Reimbursement of Project Expenditures prior to bond issuance.

Attachments:

Reimbursement of Project Expenditures

Previously Approved AIS - ASCC Building Addition Increase, UM; Green Engineering and Materials (GEM) “Factory of the Future, September 12, 2022

RESOLUTION OF THE TRUSTEES OF THE UNIVERSITY OF MAINE SYSTEM

REIMBURSEMENT OF PROJECT EXPENDITURES

Be it resolved that, for purposes of U.S. Treasury Regulation §1.150-2, the University of Maine System reasonably expects (1) to incur debt to reimburse expenditures (including expenditures made within the last 60 days) temporarily advanced from University resources, such expenditures to be made to pay the cost, or a portion of the cost, of planning, design, acquisition, construction, reconstruction, improvement, renovation, rehabilitation and equipping of the projects described below (the “Projects”) and (2) that the maximum principal amount of debt to be issued by the University of Maine System for the Projects including for reimbursement purposes is Fifteen Million Three Hundred Thousand Dollars \$15,300,000.

PROJECT**University of Maine:**

Construction, furnishing and equipping of the Green Engineering and Materials (GEM) “Factory of the Future”, a proposed addition to the Advanced Structures and Composites Center at the University of Maine.

This Resolution shall take effect immediately.

ADOPTED: September 12, 2023

University of Maine System
Board of Trustees

AGENDA ITEM SUMMARY

NAME OF ITEM: ASCC Building Addition Increase, UM; Green Engineering and Materials (GEM) "Factory of the Future"

INITIATED BY: Dannel P. Malloy, Chancellor

BOARD INFORMATION:

BOARD ACTION: X

BOARD POLICY:

701 – Budgets, Operating & Capital

UNIFIED ACCREDITATION CONNECTION:

Continued strategic and opportunity-driven growth in research at the University of Maine in the areas of 3-D printing technologies and with integration of AI opens enormous possibilities for educating engineering and computing students across the University of Maine System. Through the partnership that is developing with the University of Maine and the University of Southern Maine engineering and computing faculty as a result of the Harold Alfond Foundation UMS TRANSFORMS initiative, a vision for the Maine College of Engineering, Computing, and Information Science is underway. Educational and research learning opportunities in frontier areas of engineering and computing will be available to students across the System through GEM, thereby using some of the key affordances of unified accreditation to share opportunities across campuses.

BACKGROUND:

a. Summary of the request

The University of Maine System, acting through the University of Maine, requests to increase the authorization for the Green Engineering and Materials (GEM) Factory of the Future project by up to \$13,800,000 in external funds for a new total of \$15,300,000. The scope of this phase will include the full design of facilities and equipment and ancillary pre-construction costs for the GEM, a proposed addition to the Advanced Structures and Composites Center at the University of Maine. An Architectural & Engineering team has been competitively selected to complete this design and has recently concluded the visioning and technical definition phase and is now prepared to start the full design. This request is pursuant to Board Policy 701, which requires projects with a total cost of more than \$500,000 and any increases to those projects, be considered by the Board of Trustees or its Finance, Facilities & Technology (FFT) Committee. The request is that the FFT Committee forward the recommendation for Board consideration at the September 11-12, 2022 meeting.

b. Overall requested budget and funding source:

Funding for the \$13,800,000 is from external funds the University has received from the Maine Jobs & Recovery Act to support the GEM project, including design, construction and workforce development activities. In May of 2021, the Board authorized an initial \$1,500,000 in campus reserves.

c. Confirmation of whether the project was included or reflected in the Master Plan, Long Term capital plan or 1-year capital plan most recently approved by Trustees.

GEM is identified within the University's 10-year rolling master plan, Long Term capital plan, and 1-year capital plan approved by the Trustees.

d. More detailed explanation of rationale for project and metrics for success of the project:

No changes from prior Board authorizations.

e. Explanation of the scope and substance of the project as needed to supplement (a) and (c) above:

No changes from prior Board authorizations.

f. Changes, if any, in net square footage or ongoing operating costs resulting from the project:

No changes from prior Board authorizations.

g. Budget for the project and further elaboration on funding source and selection as needed to supplement (b):

Full design of GEM will be funded by the recently awarded \$15 million from Maine Jobs & Recovery Act (MJRP), of which \$13.8 million of the award is for use in the design and construction of GEM.

Based on recently completed preliminary design of the GEM, the total project is estimated to cost \$95 million of which approximately \$69 million is for design and construction of the building and \$26 million for equipment. The University has identified the following funding sources however not all have been secured; the University is seeking funds up to approximately \$107 million.

Building Funding \$81.55 million

Source	Amount	Status
UMaine E&G Capital	\$1,500,000	Committed
Maine Jobs & Recovery Act	\$13,800,000	Committed
National Institute of Standards and Technology (NIST) FY22	\$10,000,000	Committed
EDX Grant, including UMaine Match	\$16,250,000	Pending Award Decision
NIST FY23	\$10,000,000	Pending Appropriations
Remaining TBD	\$30,000,000	

Equipment \$26 million

Source	Amount	Status
FY22 Defense Appropriations	\$13,000,000	Appropriated, pending award
FY23 Defense Appropriations	\$13,000,000	Pending appropriations

h. Alternatives that were considered to meet the need being addressed by this project:

No changes from prior Board authorizations.

i. Timeline for start, occupancy, and completion:

The University anticipates full design to start immediately and completed by summer of 2023.

j. Timeline for any further consideration or action anticipated to be needed by the Board or its committees regarding this Project if full authority is not being requested from the outset.

The University will seek additional approval for the construction of the Green Engineering and Materials (GEM) "Factory of the Future" upon completion of design. Additional approval is anticipated for spring or summer of 2023.

k. Additional information that may be useful for consideration of the item.

Addressed in prior Board meetings.

The Finance, Facilities and Technology Committee approved this item to be forwarded to the September 11-12, 2022 Board of Trustees meeting, for approval of the following resolution:

TEXT OF PROPOSED RESOLUTION:

That the Board of Trustees accepts the recommendation of the Finance, Facilities and Technology Committee, and authorizes the University of Maine System, acting through the University of Maine to expend up to \$13,800,000 in Maine Jobs & Recover Act funds, in addition to the previously authorized \$1,500,000 campus reserves, for a total of \$15,300,000 to complete design for facility and equipment and ancillary pre-construction costs of a Green Engineering and Materials (GEM) "Factory of the Future," with all final terms and conditions subject to review and approval of the University of Maine System Treasurer and General Counsel.

[Green Engineering and Materials \(GEM\) Factory of the Future Update – Background Materials](#)

9/1/2022

University of Maine System
Board of Trustees

AGENDA ITEM SUMMARY

NAME OF ITEM: Campus Lighting Project Authorization under an Energy Savings Performance Contract, UM

INITIATED BY: Roger J. Katz, Chair

BOARD INFORMATION:

BOARD ACTION: X

BOARD POLICY:

701 – Budgets, Operating & Capital

712 – Debt Policy

UNIFIED ACCREDITATION CONNECTION:

N/A

BACKGROUND:

a. Summary of the request

The University of Maine System acting through the University of Maine requests authorization to spend up to \$2.1 million to pursue an energy savings performance contract (“ESPC”) to save energy, reduce costs, reduce carbon emissions, and improve the indoor environmental quality of campus space.

This request is pursuant to Board policy 701 which requires Board approval for projects with a value of \$500,000 or greater. Also, Board Policy 712 applies at it states that UMS “will consider off-balance sheet financing (e.g., public/private partnerships) when it is desirable to work with a third party, for risk sharing, and for leasing.”

b. Overall requested budget and funding source:

The budget of \$2.1 million includes replacing in excess of 6,000 light fixtures with energy saving LED light fixtures in over 60 buildings on campus. The work will be financed through the University of Maine Foundation, to be repaid from savings achieved by the project.

c. Confirmation of whether the project was included or reflected in the Master Plan, Long Term capital plan or 1-year capital plan most recently approved by Trustees.

This project is identified in the 1-year capital plan most recently approved by Trustees.

d. More detailed explanation of rationale for project and metrics for success of the project (ROI or other):

The project is expected to reduce energy use by approximately 1.3 million kWh per year. At current market rates, that would be an estimated annual savings in excess of \$350,000. The actual savings will depend not only on the actual avoided energy consumption but also on changes in the market and contract rates for energy.

8/14/23

e. Explanation of the scope and substance of the project as needed to supplement (a) and (d) above.

UMaine has been working with Honeywell to pursue demand-side opportunities within the campus grounds and building infrastructure that promise many expected benefits: improving the indoor environmental quality of the learning environment, conserving energy and increasing efficiencies, reducing the university's environmental impact, reducing energy and utility costs, and renewal of critical utility infrastructure throughout the campus and within campus buildings that are essential to fulfillment of the University's mission.

To date, UMaine has commenced this demand-side initiative through an investment grade audit ("IGA") for eight key campus buildings, which the University believes may greatly benefit from this initiative. The IGA also includes a lighting audit for much of the campus interior space and most of the exterior space. Honeywell has achieved a 60% development of the IGA for most of the measures identified. However, in the interest of executing known beneficial opportunities, UMaine has expedited development of the interior lighting project.

Working with Honeywell, the University is continuing development of measures identified through the process of the IGA. Upon substantive advancement of these initiatives, the University will return to the Board for further consideration of project authorizations.

f. Changes, if any, in net square footage or ongoing operating costs resulting from the project:

This project will not change any net square footage. The University anticipates reduced operating costs from the installation of modern LED light fixtures.

g. Budget for the project and further elaboration on funding source and selection as needed to supplement (b) above):

This project is self-funding, the investment cost to be paid through the reduced energy consumption that is estimated to result in more than \$350,000 savings annually.

h. Alternatives that were considered to meet the need being addressed by this project:

N/A

i. Timeline for start, occupancy and completion:

Upon Board approval, the University will seek to execute financing and contracts for the work with Honeywell. The work could commence this fall and is expected to last approximately 12 months in duration.

j. Timeline for any further consideration or action anticipated to be needed by the Board or its committees regarding this project if full authority is not being requested from the outset.

The University does not anticipate any further consideration or action needed by the Board or its committees.

k. Additional information that may be useful to consideration of the item.

This item pertains to Strategic Plan Goal 3.3: Identify reductions in energy consumption, including strategic management of underused or unused buildings and offices during periods of peak energy consumption (winter and summer).

8/14/23

TEXT OF PROPOSED RESOLUTION:

That the Finance, Facilities, and Technology Committee approves the following resolution to be forwarded for Board of Trustee approval at the September 9th & 10th, 2023 Board Meeting.

That the Board of Trustees accepts the recommendation of the Finance, Facilities, and Technology Committee, and authorizes The University of Maine System acting through the University of Maine to spend up to \$2.1 million to pursue an energy savings performance contract (“ESPC”) to save energy, reduce costs, reduce carbon emissions, and improve the indoor environmental quality of campus space. Final terms and conditions of the financing to be approved by the Vice Chancellor for Finance & Administration and Treasurer.

Item Withdrawn

8/14/23

University of Maine System
Board of Trustees

AGENDA ITEM SUMMARY

NAME OF ITEM: University of Maine, Advanced Structures and Composite Center (ASCC), Secure Smart Textiles Laboratory Authorization Increase

INITIATED BY: Roger J. Katz, Chair

BOARD INFORMATION:

BOARD ACTION: X

BOARD POLICY: 701 – Budgets, Operating & Capital

UNIFIED ACCREDITATION CONNECTION: N/A

BACKGROUND:

a. Summary of the request

The University of Maine System, acting through the University of Maine, requests to increase the authorization for phase 2 of the Secure Smart Textiles Laboratory within the Advanced Structures and Composite Center (ASCC) by an additional \$1,880,738 million. The Board of Trustees approved \$2,451,268 in March of 2022; thus, this additional request would bring the total approved expenditure up to \$4,332,006. This request is the second of three requests that will be needed for full completion and occupancy of the laboratory.

This project is in direct support of UMS Strategic Plan 2023-2028, Commitment 1, Research Actions, Goal 1.1. This project investment in infrastructure will enhance UMaine's research capacity. This request is pursuant to Board Policy 701, which requires projects with a total cost of more than \$500,000 and any increases to those projects, be considered by the Board of Trustees or its Finance, Facilities & Technology (FFT) Committee. In this case the Committee's recommendation will be forwarded to the Full Board for consideration.

b. Overall requested budget and funding source:

Full funding for this work (second phase) will be in the amount of \$4,282,006 and has been secured from U.S. Army Natick Soldiers System Center (Natick) contracts.

c. Confirmation of whether the project was included or reflected in the Master Plan, Long Term capital plan or 1-year capital plan most recently approved by Trustees.

The ASCC secure smart textiles laboratory is identified within the University's 10-year rolling master plan, 5-year capital plan, and 1-year capital plan approved by the Trustees.

d. More detailed explanation of rationale for project and metrics for success of the project:

Due to funding constraints, phase 1 approved scope of the secure lab with limited occupancy due to access and means of egress limitations; this current (second) phase will allow the

ASCC to begin production of the textiles for research in a provisionally compliant limited occupancy mode, and allows the lab to meet research contract obligations. Full occupancy would necessitate ADA compliant access to be later appended to an enclosed elevator-stair tower as a subsequent (third) phase.

Textile technologies are used throughout many ASCC research projects, and the proposed lab will allow these projects to be supported internally and expand further research opportunities. Capabilities and projects will further the development of green and bio-friendly materials for use in textiles, lightweight structures and 3D printing. “Smart” material systems will be developed, refined, and prototyped to the level of a commercial product.

e. Explanation of the scope and substance of the project as needed to supplement (a) and (c) above:

The scope includes addition of HVAC service and construction of an enclosed stair tower and an unenclosed exterior egress stair tower to meet provisional egress requirements for limited occupancy of the laboratory. This will yield a provisional, limited-occupancy functional laboratory for meeting research deliverables and milestones under the Natick contracts. An additional (third) phase would supplement the unenclosed exterior egress stair tower with an enclosed elevator stair tower and support regular occupancy and ADA accessibility.

f. Changes, if any, in net square footage or ongoing operating costs resulting from the project:

The design will add 960 square feet for an entry vestibule, stairways, and elevator shaft. The current (second) phase will add 510 square feet not including exterior staircase, the subsequent (third) phase will add an enclosed elevator-stair tower. Operating costs for this laboratory will be paid by University ASCC via facility and administrative (F&A) rates charged to federal projects that use the space.

g. Budget for the project and further elaboration on funding source and selection as needed to supplement (b):

Funding for construction is available in the correct accounts within US Army Natick contracts. These contracts allocate a budget of \$4,332,006 for design and construction of the laboratory for smart textile and rapidly deployable shelter systems through completion of phase two. Additional funding will need to be secured for the completion of the project in phase three.

h. Alternatives that were considered to meet the need being addressed by this project:

Available space to accommodate the activities required to be accomplished in the laboratory is presently not available within the ASCC or on the UMaine campus.

i. Timeline for start, occupancy, and completion:

Construction (phase one) is currently in process and phase two would start late fall of 2023 with limited occupancy anticipated by fall of 2024, subsequent regular occupancy could be provided by end of 2027.

- j. **Timeline for any further consideration or action anticipated to be needed by the Board or its committees regarding this Project if full authority is not being requested from the outset.**

Additional authorization for costs of an additional (third) phase that includes the construction of a stair tower and elevator to meet code requirements for regular occupancy of the space will be presented once funding is secured. The University anticipates approval for the additional (third) phase in 2025 or 2026.

- k. **Additional information that may be useful for consideration of the item.**

Funds to complete construction of phase two are fully available and committed to this project through several contracts with them (Natick). This lab will allow expanded textile research and open new funding opportunities for textile and deployable shelter research with Natick and other funding agencies. The project is necessary to execute research tasks focused on developing advanced textile materials for the Department of Defense.

TEXT OF PROPOSED RESOLUTION:

That the Finance, Facilities, and Technology Committee, approves the following resolution to be forwarded for consideration at the September 10-11, 2023, Board Meeting:

That the Board of Trustees accepts the recommendation of the Finance Facilities and Technology Committee and authorizes the University of Maine System, acting through the University of Maine, to expend an additional \$1,880,738 for a total of \$4,332,006 to renovate a portion of the existing ASCC facility to accommodate installation of a Secure Smart Textiles Laboratory to be utilized for research on smart materials.

Attachment

[Previously Approved ASCC](#)

University of Maine System
Board of Trustees

AGENDA ITEM SUMMARY

NAME OF ITEM: Secure Laboratory, Advanced Structures and Composite Center (ASCC), UM

INITIATED BY: Dannel P. Malloy, Chancellor

BOARD INFORMATION:

BOARD ACTION: X

BOARD POLICY:

701 – Budgets, Operating & Capital

UNIFIED ACCREDITATION CONNECTION:

The Secure Lab will be located at the University of Maine campus and will include highly-specialized research facilities and equipment that can be leveraged for researchers across the University of Maine System.

BACKGROUND:

a. **Summary of the request.**

The University of Maine System acting through the University of Maine requests authorization to expend up to \$2,451,268 to construct approximately 4,000 square feet of space mostly within the Advanced Structures and Composites Center (ASCC) located at the University of Maine to create a secured clean laboratory for textiles research. Funds to complete construction are fully available and committed to this project through several contracts with the U.S. Army Natick Soldiers System Center (Natick).

b. **Overall requested budget and funding source.**

This request is pursuant to Board of Trustees Policy 701 which requires projects with a total cost of more than \$500,000 to be considered by the Board of Trustees or its Finance, Facilities and Technology Committee. In this case the Committee's recommendation will be forwarded to the Consent Agenda for Board of Trustee approval at the March 2022 Board meeting. The budget for this project is funded through a multi-year, multi-million-dollar contract with the U.S. Army Natick Soldier System Center. The additional square footage is dedicated to and in support of research activity so does not require Trustee authorization.

c. **More detailed explanation of rationale for project and metrics for success of the project (ROI or other).**

This project is the second and final part of a two-phase construction project that included secure offices and secure lab space. An initial phase of this project included construction of secure offices within the ASCC. That phase is now completed and the offices are occupied. This next phase will provide for construction of the secured clean lab space. This will include adding a 2nd floor above the existing, high bay, Thermoplastics Lab located at the ASCC.

This lab will allow expanded textile research and open new funding opportunities for textile and deployable shelter research with Natick and other funding agencies. The project is necessary to execute research tasks focused on developing advanced textile materials including photovoltaic wires and color changing filaments.

03/17/2022

Textile technologies are used throughout many ASCC research projects and the proposed lab will allow these projects to be supported internally and expand the options of what can be explored with further research. Capabilities and projects will further the development of green and bio-friendly materials for use in textiles, lightweight structures and 3D printing. "Smart" material systems will be developed, refined, and prototyped to the level of a commercial product.

d. Explanation of the scope and substance of the project as needed to supplement (a) and (c) above.

The second-floor construction above the existing Thermo-Plastic / Robotics Laboratory will include installation of a structural steel frame and concrete deck, stairs, mechanical, electrical, life safety/fire alarm, sprinkler, AV/IT, and architectural finishes to develop the second-floor space and all necessary requirements for continued operation of the first-floor laboratory.

e. Changes, if any, in net square footage or ongoing operating costs resulting from the project.

The design being developed will create an estimated 4,000 square feet, most of which is within the existing building footprint. Any increases in operating costs will be covered by ASCC contracts which support these costs through Facilities and Administrative (F&A) rates charged on research projects.

f. Budget for the project and further elaboration on funding source and selection as needed to supplement (b) above.

Funding for this construction phase is available and unencumbered in the correct accounts within contract W911QY-18-C-0101 P00006 and W911QY-20-C-0053.

g. Alternatives that were considered to meet the need being addressed by this project.

Many alternatives within and around the existing ASSC footprint were studied but found to be inadequate or cost prohibitive. Available space to accommodate the activities required to be accomplished in the Secure Laboratory are presently not available within the ASCC or cleanrooms at the UMaine campus.

h. Timeline for start, occupancy and completion

Design is currently in process with construction anticipated to start in the fall of 2022, with completion for occupancy in summer of 2023.

i. Timeline for any further consideration or action anticipated to be needed by the Board or its committees regarding this project if full authority is not being requested from the outset.

The present action is expected to accomplish the requirements of the laboratory with the funding available.

j. Additional information that may be useful to consideration of the item.

None

The Finance, Facilities & Technology Committee approved this recommendation to be forwarded to the Consent Agenda for Board of Trustee approval at the March 27-28, 2022 Board meeting.

03/17/2022

TEXT OF PROPOSED RESOLUTION:

That the Board of Trustees, accepts the recommendation of the Finance, Facilities and Technology Committee, and authorizes the University of Maine System acting through the University of Maine to expend up to \$2,451,268 to construct approximately 4,000 square feet of space mostly within the existing ASCC facility to accommodate installation of a Secure Laboratory to be utilized for research on smart materials.

AGENDA ITEM SUMMARY

NAME OF ITEM: Dental Clinic Expansion
University of Maine at Augusta

INITIATED BY: Roger J. Katz, Chair

BOARD INFORMATION:

BOARD ACTION: X

BOARD POLICY:

701 – Budgets, Operations and Capital

UNIFIED ACCREDITATION CONNECTION:

Provides the ability to expand UMA's Dental Programs which increases enrollment and expands the dental workforce throughout Maine.

BACKGROUND:

a. Summary of the request

The University of Maine System acting through the University of Maine at Augusta requests approval to expand the Dental Clinic located at the Lewiston-Auburn Campus in Lewiston, Maine.

The request is pursuant to Board of Trustees Policy 701 – Budgets, Operating and Capital which requires approval from the Finance, Facilities and Technology Committee to approve capital budgets of at least \$500,000 and less than \$1,000,000.

b. Overall requested budget and funding source:

The total project cost is estimated to be \$665,000 including construction, equipment, furnishings, instruction, and student support. Funding for the project comes from a \$665,000 grant from the Northeast Delta Dental Foundation.

c. Confirmation of whether the project was included or reflected in the Master Plan, Long Term capital plan or 1-year capital plan most recently approved by Trustees.

The project is not included in the 1-year capital plan as the grant was received after the plan was already developed.

d. More detailed explanation of rationale for project and metrics for success of the project (ROI or other):

The State of Maine continues to experience a significant shortage of formally trained oral health professionals. Over the past decade, access to oral health care has become an emergent concern. Despite efforts to improve the oral health of Maine's population, oral health

08/14/2023

disparities continue. These disparities are characterized by compromised oral health status for certain vulnerable populations, including the poor, children, racial and ethnic minorities, people with special needs, and the elderly. One of the factors believed to influence access to oral health services and contribute to these disparities is the available supply of oral health professionals. With this expansion, the Dental Clinic in Lewiston will expand its annual Dental Assisting Program enrollment from six to 12 students. The Expanded Function Dental Assisting Program will increase its annual enrollment from 12 to 18 students. Combined with the programs located in Bangor, Maine, UMA will be providing 24 dental assistants and 30 expanded function dental assistants each year to the statewide workforce shortage.

e. Explanation of the scope and substance of the project as needed to supplement (a) and (d) above.

Thanks to the grant, the proceeds of which have already been received by UMA, all costs associated with construction, furnishings, equipment, instruction, and student support are covered.

f. Changes, if any, in net square footage or ongoing operating costs resulting from the project:

Through a Mutual Understanding with the University of Southern Maine and the University of Maine at Augusta, an additional 474 square feet will be allocated to UMA for the Dental Clinic expansion at an increased cost to UMA of \$4,740. The total amount of space allocated to UMA is now 6,038 square feet at a cost to UMA of \$60,380 annually, which covers any additional operating expenses incurred by USM. No additional square footage is being added to the Lewis-Auburn Campus.

g. Budget for the project and further elaboration on funding source and selection as needed to supplement (b) above):

Approximately \$200,000 will go toward construction, with the remainder of the grant covering the cost of furnishings, equipment, instruction, and student support.

h. Alternatives that were considered to meet the need being addressed by this project:

Other locations in the Lewiston area were considered, but economically it was determined that utilizing LAC was more feasible and better for UMS.

i. Timeline for start, occupancy, and completion:

Work will begin immediately upon approval with an anticipated completion in the spring of 2024 and occupancy shortly thereafter.

j. Timeline for any further consideration or action anticipated to be needed by the Board or its committees regarding this project if full authority is not being requested from the outset.

Not applicable.

k. Additional information that may be useful to consideration of the item.

None

08/14/2023

TEXT OF PROPOSED RESOLUTION:

That the Finance, Facilities and Technology Committee approves the expenditure of \$665,000 for the expansion of the University of Maine at Augusta Dental Clinic located on the Lewiston-Auburn Campus in Lewiston, Maine.

AGENDA ITEM SUMMARY

5

NAME OF ITEM: Renewal of Allagash Wilderness Camp Land Lease

INITIATED BY: Roger J. Katz, Chair

BOARD INFORMATION:

BOARD ACTION: X

BOARD POLICY: 801 Acquisition of Real Property

UNIFIED ACCREDITATION CONNECTION:

In 2019 this longstanding lease within Maine Public Reserved Lands was amended to include language allowing usage of the camp by “other University of Maine System campuses for the purpose of natural resource-based education or research.”

BACKGROUND:

In 1998 an agreement was entered into between the University of Maine System (d/b/a UMFK) and the Maine Department of Conservation Bureau of Parks and Lands for a no-cost lease of a 2.3 acre parcel of land located in T13 R12 WELS, Round Pond Unit of Maine Public Reserved Lands. A wilderness camp was built on this remote site, within the proximity of the Allagash River watercourse, for instructional and other educational purposes. In 2019 the restricted use was amended to allow usage of the camp by “other University of Maine System campuses . . . for the purpose of natural resource-based education or research.” This request is simply to renew the no-cost lease for an additional term of ten (10) years.

TEXT OF PROPOSED RESOLUTION:

That the Finance, Facilities, and Technology Committee approves the following resolution to be forwarded for Board of Trustee approval at the September 10, 2023 Board Meeting.

That the Board of Trustees accepts the recommendation of the Finance, Facilities, and Technology Committee, and authorizes the renewal of a ten (10) year no-cost lease of a 2.3 acre parcel of land in T13 R12 WELS, Round Pond Unit of Maine Public Reserved Lands as the continuing site for the Allagash Wilderness Camp.

[UMFK as Lessor, ME Department of Agriculture, Conservation, and Forestry](#)

STATE OF MAINE
Department of Agriculture, Conservation, and Forestry

Maine Department of Conservation
Bureau of Parks and Lands

LEASE

Pursuant to 12 M.R.S.A., Section 1852 (3) the State of Maine, acting by and through the Director of the Bureau of Parks and Lands, Maine Department of Conservation (hereinafter referred to as “the Bureau” leases to the University of Maine System, acting through the University of Maine at Fort Kent, (hereinafter referred to as “the University”) the following land under the following terms and conditions:

1. **LOCATION:** a parcel of land two and one third (2.3) acres in size, located on Public Reserved Land in T13-R12 W.E.L.S., adjacent to the so-called “Sweeney Brook Road”, approximately one (1) mile in a westerly direction from its intersection with the so-called “Blanchette Road,” as depicted on the plan attached hereto as Exhibit A.
2. **TERM:** This Lease shall be for the term of ten (10) years commencing July 22, 2023 ending at midnight July 21, 2033.
3. **ANNUAL RENTAL PAYMENT:** There shall be no annual rental fee.
4. **USE:** Except as provided below, the University agrees that the property shall be used solely as the location of a base camp for educational and scientific studies, regardless of discipline. The facility may be used by other University of Maine System campuses or other educational organizations solely for the purpose of natural resource-based education or research. The facility may be used for campus-related administrative programs, recruitment initiatives, or other similar uses. The property may not be used for commercial or recreational purposes.

Occupancy of any building(s) constructed by the University on this premises shall not exceed a total of eighteen (18) persons in the aggregate, at any given time. The University may only use the premises when at least one faculty member and/or staff member is present. Faculty and students shall not access Round Pond or the Allagash River except by authorized access points on the Allagash River. Equipment, including but not limited to vehicles, canoes, trailers, tents, and snowmobiles shall not be left within the Restricted Zone of the Allagash Waterway.

Use of the premises, including buildings shall be conducted in such a manner as to be invisible and inaudible from the Allagash River watercourse. Round Pond and the Waterway’s Restricted Zone and shall not detract from the experience of visitors to the Waterway.

5. TERMINATION: The bureau reserves the right to terminate this Lease at any time, when in its sole discretion it determines that termination is in the best interests of the State. No adjustment or compensation will be due to the University on account of any such termination. The University shall have the right to terminate this Lease for any or no reason upon ninety (90) days prior written notice to the Bureau.

6. PROPERTY: Upon termination of the Lease for any reason, the University will have 180 days to remove its real and personal property from the premises and restore the site to its condition at the beginning of this Lease. Any property not removed from the premises, including buildings, shall become the sole and exclusive property of the Bureau.

7. ROADS: The University shall construct no roads on or to the premises without the prior written approval of the Bureau. The Bureau shall have no obligation to erect or maintain any roads or paths or otherwise to provide access to the premises.

8. ALTERATIONS: The University may not install any structure or permanent improvement or make any addition or alteration to any structure or permanent improvement without the prior written consent of the Bureau Director. Structures or permanent improvement shall include, without limitation, buildings, foundations, added rooms, outbuildings, septic systems and roads.

9. CONDITIONS: The University shall comply with each and every condition set forth herein below, together with such other reasonable conditions as the Bureau may, in its own discretion, add hereto by written notice to the University. Upon receipt of such notice, the University shall have the option to terminate the Lease. The University may exercise that option to terminate by notifying the Bureau within 30 days after the Bureau's notice of additional conditions. Said termination will become effective immediately upon the University's notice of termination. If the University does not exercise its right to terminate under this section, the Bureau's additional conditions will become effective 31 days after the Bureau's notice of additional conditions.

A. Buildings shall be sided with logs or wooden shingles. Clapboards, boards and battens, tar paper, imitation brick or stone, asphalt shingles, canvas or sheathing paper shall not be used for exterior siding. Development of the property shall not detract from the existing character of the site. Equipment such as canoes, boats, trailers and vehicles shall be stored in a neat and orderly manner, screened from view. The Bureau may require any vegetative screening it deems appropriate to protect the predominantly natural character of the setting.

B. The University shall not cut or kill any living tree greater than four inches in diameter (four feet above the ground), without the prior written consent of the Bureau.

C. The University shall prevent all accelerated erosion of soils or sediment from the property into any waters, and shall use no chemical defoliant, brush killers or residuals pesticides on the property.

D. The University shall maintain the property, including all improvements thereon, in a good neat and clean condition. No trash or solid waste shall be permitted to accumulate on the property and no incineration shall be permitted thereon.

E. Each chimney shall be equipped with a screen of one-quarter (1/4) inch mesh or smaller. Overhanging branches or foliage within three (3) feet horizontally or ten (10) feet vertically from the top of any chimney or stove pipe shall be removed.

F. The University shall not close or otherwise restrict access along any road or right-of-way without the prior written consent of the Bureau. At no time shall parked cars obstruct any road open to travel.

G. The Bureau, its employees, and its agents shall have the right to go onto and pass over the premises for any reasonable purpose, including inspection of the leased premises, during reasonable hours and shall have the right to make such use of the premises as shall not unreasonably interfere with the use thereof by the University, provided that the Bureau shall not use the building(s) and/or other improvements without the prior written consent of the University. Corner posts and lot lines indicating lot boundaries shall not be disturbed in any way.

H. The University shall be liable to the Bureau for loss and expenses incurred by the Bureau by reason of the University's failure to comply with the present or future conditions of this Lease.

I. The University shall comply with State Plumbing Code Subsurface Waste Water Disposal Regulations, the laws and rules of the Land Use Regulation Commission, and all other Federal, State and local laws, regulations, or requirements, including those of the Bureau that apply to the use of the Allagash Wilderness Waterway by the general public.

10. SURRENDER: Upon termination of this Lease for any reason, the University shall deliver the premises to the Bureau in reasonable good condition clear of trash and debris.

11. LIENS: The University shall be responsible for all tax levies, assessments, license fees and permit fees associated with the Lease. The University shall keep the demised premises free and clear from all mechanics liens for work or labor done, services performed, appliances, water supplied, sewerage disposed of, power contributed, used or furnished in or about the premises for or in connection with any operation of the University, or any alterations, improvements, repairs, or additions which the University may make or permit or cause to be made, or any work in connection, by, for, or permitted by the University on or about the premises.

12. INDEMNITY: The University shall indemnify, defend, and hold harmless the Bureau and its agencies, officers, agents, and employees, against and from all cost, expenses, liabilities, losses, damages, inspections, suits, actions, fines, penalties, claims, and demands of every kind and nature, including reasonable counsel fees, asserted by or on behalf of any person, utility or governmental authority whatsoever arising out of (a) any failure by the University to perform

any of the agreements of this Lease on the University's part to be performed, (b) the use of the premises by the University or its employees, licensees, agents, guests, invitees, customers, contractors, or officers; (c) any accident, injury or damage that occurs in or about the leased premises by the University, or appurtenances thereof, however, occurring during the term of this Lease or any renewal thereof and (d) any matter or thing growing out of the condition, occupation, maintenance, alteration, repair, use of operation of the demised premises, appurtenances thereto or any part during the term of this Lease or any renewal thereof. This indemnification shall not extend to any claim or cost that is caused by the Bureau, its employees, agents, contractors or licensees. This indemnification provision is for purposes of allocating, as between the University and the Bureau, the risk of liability exposure, but this provision is not intended, and shall not be construed, to alter or waive the scope or limits of liability of the University, the Bureau, or the State of Maine under the Maine Tort Claims Act, 14 M.R.S.A. Section 8101 et seq. and other applicable law.

13. NONDISCRIMINATION: The University will not discriminate against any employee or applicant for employment because of race, sex, creed, color, or national origin, and will take affirmative action to insure that employees and applicants are afforded equal employment opportunities without discrimination because of race, sex, creed, color, or national origin. Such action shall be taken with reference but not limited to: recruitment, employment, job assignment, promotion, upgrading, demotion, transfer, layoff or termination, rates of pay or other forms of compensation and selection for training. The University will state, in all solicitations or advertisements for employees placed by or on behalf of the University, that all qualified applicants will be afforded equal employment opportunities without discrimination because of race, sex, creed, color or national origin.

14. NOTICES: Unless otherwise noted, wherever it is provided in this Lease that notice, demand, request, or other communication shall or may be given to or served upon either of the parties by the other, and whenever either of the parties desires to give or serve upon the other any notice, demand, request or other communication with respect to this Lease or the leased premises, each such notice, demand, request or other communication shall be in writing, and addressed to the University or the Bureau at the following addresses:

Director, Bureau of Parks and Lands	President, University of Maine at Fort Kent
22 State House Station	23 University Drive
Augusta, Maine 04333-0022	Fort Kent, Maine 04743-1292

A copy of all notices to the University should be sent to the Chief Financial Officer and Treasurer, University of Maine System, 107 Maine Avenue, Bangor, Maine 04401.

15. AMENDMENT: This Lease may only be amended, renewed or modified in a writing signed by both parties.

16. GENERAL PROVISIONS

A. Governing Law. This Lease shall be construed and interpreted in accordance with the laws of the State of Maine.

B. Savings Clause. The invalidity or unenforceability of any provision of this Lease shall not affect or impair the validity of any other provision. To the extent any provision herein is inconsistent with applicable State statute, the statute shall govern.

C. Paragraph Headings. The paragraph headings herein are for reference and convenience only and shall not affect the interpretation of this Lease.

D. Counterparts. This lease may be executed in any number of counterparts, each of which shall be an original, but all of the counterparts together shall constitute one and the same instrument.

E. Waiver. Failure on the part of either party to complain of any action or inaction on the part of the other party no matter how long the same may continue shall not be deemed to be a waiver of any of such party's rights hereunder. Furthermore, it is covenanted and agreed that no waiver at any time of any of the provisions hereof by either party shall be construed as a waiver of any other provisions hereof and that any waiver at any time of any of the provisions hereof shall not be construed at any subsequent time as a waiver of the same provisions. The approval of either party to or for any action by the other requiring that party's consent or approval shall not be deemed to waive or render unnecessary the party's consent or approval to or of any subsequent similar act by the other party.

F. Entire Agreement. This document constitutes the entire agreement between the parties; and no other representation, written, spoken, or implied, shall be binding upon either party, except as amendments to this Lease may be duly authorized and attached hereto.

G. Lessee's Representations. Lessee represents and warrants to Lessor that this Lease has been duly authorized by all necessary action on the part of Lessee.

IN WITNESS WHEREOF the parties have executed this Lease as of the day and year first above written.

Oracle Cloud ERP/EPM		Executing	July 2024	25%
CS Reimplementation		Planning	December 2026	N/A

Project Summary Update**Oracle Cloud HCM and ERP Projects:**

The HCM project team is focused on completing data conversions and finalizing business decisions required for HCM App2.0 Review sessions. Although substantial progress has been made in both areas, the App2.0 Review sessions, originally scheduled for mid-August, are now planned for mid-October. This schedule adjustment will allow the additional time needed to complete the required data conversions, finalize business process decisions, and for the Drivestream team to build the App2.0 environment. Among the pending decisions are future processes for position approvals, evaluating the adoption of Oracle Cloud Recruiting and Onboarding modules for student employee recruitment and hiring, and finalizing Time & Labor module decisions related to web clock punch-in and punch-out procedures.

The ERP project team is preparing for the Purchasing and Accounts Payable App1.0 Review sessions scheduled for the week of August 14. Recent decisions include finalizing a new Chart of Accounts (COA) structure for the cloud and a

standard set of Finance and HR Department codes. Additionally, the team is collaborating with Drivestream to determine strategies for how the current Jaggaer (purchasing) and Concur (travel/expense management) platforms will coexist with Oracle Cloud.

The UMS and Drivestream technical teams collaborated to identify strategies to streamline data conversion efforts, which have required substantial time and manual effort from the UMS technical team. To address this challenge, plans are underway to enable Drivestream resources to extract data from PeopleSoft staging tables. This approach will greatly reduce the need for the UMS technical team to manage data extractions, enabling them to focus on essential pre-conversion requirements and integration review tasks.

CS Reimplementation Project:

Functional and technical Business Process Assessment (BPA) Sessions continue. ERPA continues to develop the BPA document with a target date for completion of August 31, at which time walk-through/ Q&A sessions will be scheduled to review the documents with the UMS. This in-depth documentation will include recommendations for future business processes, configurations, and development efforts that will support UMS short-term and long-term strategic priorities.

Additionally, the UMS and ERPA project teams have been focusing on the UMM/UMaine merger, specifically the Admissions module. The merger required an innovative approach to displaying applicant requirements/checklist items in self-service to prevent duplication. The automation that has been developed as part of this solution will greatly improve processing for admissions offices and international programs and will augment functionality currently being used in CS while reserving additional enhancements to admissions processing for future phases/roll-outs. The processes were implemented on August 1 in time to support the processing of applications for the Fall 2024 semester.

The team is closely collaborating with the Oracle Cloud HCM and ERP technical teams to ensure alignment of any interdependencies between the systems, both in short and long-term scenarios.

UMS IT Project (>\$250,000) Review

Managed Print Services (Xerox)

Completed

- All Xerox devices have been received. Approximately 20 devices remain to be deployed at remote sites or areas being renovated.
 - Devices Installed: 640 (reduction from 1,203 Canon devices)
 - Pages Printed: > 1,600,000
 - Active users: 4,210
- Find-Me printing reduces waste, cost, environmental impact, and security risk.
 - Pages NOT Printed: 138,136
 - Trees Saved: 11.66
 - Value of Jobs NOT Printed: \$8,878

Risk

- Continued communication necessary regarding cost are charged to departments.
- Many installations have occurred since the end of the spring semester when faculty and students are not on campus. This may increase the need for support at the start of the fall semester.

Board of Trustees

AGENDA ITEM SUMMARY

NAME OF ITEM: Capital Projects Status Report and 2018 Bond Projects Update, UMS

INITIATED BY: Roger J. Katz, Chair

BOARD INFORMATION: X

BOARD ACTION:

BOARD POLICY: 701 Operating & Capital Budgets

UNIFIED ACCREDITATION CONNECTION: N/A

BACKGROUND:

Executive Summary

The Capital Project Status Report for the August 23, 2023, meeting of the Finance, Facilities, and Technology Committee of the University of Maine System is attached. This report provides a comprehensive update on the status of capital projects, market impacts, 2018 bond project status, research space approvals, and specific project details.

Key Capital Project Highlights:

- **Total Projects:** 39 projects are currently active, with three new additions since the last report; one at UMPI and two at UMF.
- **Approved Project Estimates:** Over \$400 million, with over 61% expended to date.
- **Project Highlighting:**
 - Yellow: Current P3 projects.
 - Green: Projects at Board approval level utilizing Harold Alfond Foundation (HAF) grant and matching money.
 - Separate Table: HAF projects below Board approval level.
- **2018 Bond Funds:** A few projects funded with 2018 bond funds remain on the Capital report pending the Percent for Art process realization.

COVID-19 and Current Market Impacts on Capital Construction

- Market instability, equipment delays, and labor shortages continue to create challenges for the bidding and estimating climate.

2018 Bond Project Status Report

- **Active Projects:** 37
- **Closed Projects:** 35
- **Total Projects:** 72
- **Funding:** Nearly all of the \$49 million in voter-approved general obligation bond funding has been allocated, with approximately \$45 million expended.
- **Supplemental Funding:** Over \$72 million, including bond funding and other resources.
- **Reporting:**

- Projects above Board Threshold also appear on Capital Project report
- As projects are closed, they are moved to the closed section and will remain on the report until all projects are completed.

Research Space Approvals

- No new approvals for Chancellor-approved increases in University-owned or occupied space for research purposes.

Specific Project Updates

UMF Campus ESCO Project:

- **Interior and Exterior Lighting Upgrades:** Completed.
- **Building Envelope Improvements:** Completed.
- **HVAC Duct and Piping Thermal Insulation:** Completed.
- **Water Fixture Upgrades:** Upgrades to efficient water fixtures are complete.
- **Building Automation System and Energy Management Control Systems:** 75% complete, including the replacement of Variable Air Volume units.
- **New Biomass Boiler and Plant Addition:** In construction; on target for delivery of boiler by end of August; goal to be operational by mid-September.
- **Roof Top Units:** Awaiting delivery on some; installation will be coordinated around building occupancy.
- **Residence Halls Work:** Completed.
- **Completion Timeline:** Most work will be complete by Fall 2023, with some items extending to summer 2024.

UMF Early Childhood Education Center Project:

- **Delay in Roof Top Unit:** This has caused a delay in the center's opening until the end of September.
- **Class Start Date:** Scheduled to start in the space by October 2.
- **Completion Timeline:** All work, except for the Roof Top Unit, will be complete by mid-August.

Harold Alfond Foundation (HAF) Grant Funded Projects:

- **Athletics:** Projects continue as reported previously, with no significant changes.
- **MCEC:** No change in status.

USM Portland Development Projects:

- **Portland Commons Residence Hall:** On target for initial, partial occupancy by mid-August and full student move-in during the last week in August.
- **Career and Student Success Center (McGoldrick Center):** Substantially complete and occupied, with some finish work and punch list items ongoing.
- **Parking Garage:** Received approval for a partial occupancy permit; additional work related to delivery delays is ongoing.
- **Center for the Arts:** GMP accepted, and work has begun, marking the commencement of a significant cultural addition to the campus.

**Data Notes:****Explanation of Funding Categories:**

- **Direct Capital Appropriations Funds:** These consist of State capital appropriations in anticipation of UMS revenue bonding, as well as State MEIF funds. They represent specific allocations made by the State for capital projects.
- **Campus Funds:** This category may include internal loans or other funding mechanisms that are generated and managed within the University's financial structure.
- **Other Financing:** This category includes interim financing, master lease agreements, and other miscellaneous sources as available and/or expended. Due to the complexity and lower relative value of the funding sources in this category, such amounts are not reclassified if later refunded with other sources.
- **Reason for Categories:** These categories help in understanding the various sources of funding for the projects and provide transparency in how funds are allocated, utilized, and reported.

April 2023 - Reclassification of Bond Anticipation Note (BAN):

- **Details:** In April 2023, there was a reclassification of the Bond Anticipation Note (BAN) from the category “Other financing” to “Revenue Bonds & BANs.”
- **Reason:** This reclassification was made to better align project funding sources and ensure that the categorization accurately reflects the nature of the BAN within the financial reporting structure.

September 2022 - Adjustment to Reflect Incorrect Funding Sources:

- **Details:** The data for September 2022 was adjusted to correct inaccuracies in the reporting of funding sources that were identified in the October 2022 report.
- **Reason:** This adjustment ensures that the historical data accurately represents the funding sources and aligns with the correct categorization and accounting principles.

University of Maine System
Board of Trustees

AGENDA ITEM SUMMARY

NAME OF ITEM: FY2024 Finance, Facilities & Technology (FFT) Committee Work Plan

INITIATED BY: Roger J. Katz, Chair

BOARD INFORMATION: X

BOARD ACTION:

BOARD POLICY:

UNIFIED ACCREDITATION CONNECTION:

BACKGROUND:

Annually, a work plan for the Finance, Facilities & Technology Committee is formulated. The work plan is intended to cover both action items required for governance of the University of Maine System and those topics of importance and interest to the Board. Trustee Katz and Vice Chancellor Ryan Low will review the draft plan with the Committee in preparation for inclusion in the September Board of Trustee meeting materials.

Attachment

[FY2024 FFT Work Plan](#)

University of Maine System
Board of Trustees

**Finance, Facilities & Technology Committee
Work Plan FY2024**

Standing Agenda

1. Finance, Facilities or Technology items requiring Committee and/or Board approval
2. Updates from staff on finance, facilities and technology informational items
 - Including regular update on enrollment
3. Capital Projects Status Report for all projects requiring Committee and/or Board approval
4. Major Technology Projects Status Report for all projects requiring Committee and/or Board approval

Ad Hoc Agenda

- Review of 5-year Capital Plan (July meeting)
- Request for Appropriation (Sept. meeting)
- **Joint Meeting of the Audit Committee and the Finance/Facilities/Technology Committee** (late October/early November meeting)
 - External Auditor Report including Required Communications Letter and Summary of Audit Results
 - Presentation of the Annual Financial Report (Audited Financial Statements)
 - Update on Internal Audit
- Annual State of IT Report (February meeting)
- Sightlines Annual Report on the status of the facilities portfolio (January meeting)
- First reading of the Annual Operating, Capital Budget and Tuition Charges (March meeting)
- Second reading of the Annual Operating, Capital Budget and Tuition Charges (April meeting)
- Approval of Annual Operating Budget, Capital Budget and Tuition Charges (May meeting)
- Multi-Year Financial & Structural Gap Analysis (May meeting)

Informational Reports to the Board

Every Board Meeting

Each meeting will include a deep dive into one topic. (examples: MYFA, Allocation Model, etc.)

November Meeting

Annual Report on Acquisition & Disposition of Real Property
Current Fiscal YTD Forecast to Budget

January Meeting

Annual Report on Gifts, Fund Raising and Endowments (w/ Foundations)
Maine Economic Improvement Fund Report
Student Financial Aid Report
State of IT Report
Sightlines Report

March Meeting

Student Charges Report
Current Fiscal YTD Forecast to Budget

May Meeting

Multi-Year Financial Analysis
5-year Capital Plan
Current Fiscal YTD Forecast to Budget

Committee Meeting Schedule

The Committee meets seven times during the year in advance of the Board of Trustees meetings.

In March, the Committee schedules a full day meeting to review, in depth, the Annual Operating Budget and Tuition Charges for the upcoming fiscal year. The Committee will meet again in April to review operating budget a second time.

Additional meetings may be scheduled as required.

UMS 5-Year Capital Plan

The five-year capital plan provides a mid-term view of planned capital investments across the system. Unlike the 1-year capital plan, the 5-year plan is designed to be aspirational. Universities not only identify projects they can execute but include important projects that still need funding secured. Each university has provided a narrative that is *italicized* in their section where they discuss their priorities, key projects, and any constraints faced in their plan. The UMS capital plan directly supports NECHE standard 7, physical resources, and address the call to “redress the buildup of critical maintenance and bring facility age in line with postsecondary sector standards” in their final report. This plan also directly addresses several key goals in the UMS Strategic Plan. All universities see their capital plan as supporting the strategic priorities of increasing enrollment (Commitment 1, Action 4, Goal 4.2) and retaining students (Commitment 1, Action 2) though modernizing and enhancing their physical plant (Commitment 2 – Fiscal Sustainability, Action 3, Goals 3.2 and 3.3) to maintain an effective infrastructure portfolio (Commitment 2, Action 1, Goal 1.1) within a fiscally sustainable environment.

This five-year capital plan identifies \$1.2B of investment supporting over 400 projects valued at over \$1.5B. Funding sources across the plan are diverse and consist of over 20 different types. The list below highlights the largest contributors to the plan and accounts for 92% of all the funding:

- TBD - \$342M (30%)
- Fundraising - \$182M (16%)
- Revenue Bonds – \$162M (14%)
- Earmarks* - \$123M (11%)
- HAF Grant - \$102M (9%)
- E&G and Aux (including reserves - \$94M (8%)
- State Capital Improvement Funds - \$45M (4%)

***Note:** The term ‘Earmark’ is used throughout this report to collectively refer to Congressionally Directed Spending (CDS).

This funding breakout is similar to the previous 5-year plan. The largest difference is in the projected fundraising category, which more than doubled what was identified in the FY23-FY27 plan. This is the result of identifying HAF Grant matching funds for athletics and engineering projects at UMaine, and the fundraising needed for the Center for the Arts project at USM.

Examining the 5-year plan by project type provides insight into priorities and how the physical infrastructure on the universities may change.

New construction is responsible for 44% of the 5-year plan, with expenditures in this category growing each fiscal year. The addition of new facilities and their square footage will require additional facility operations and maintenance funding if these new facilities are to be properly maintained. At the same time, new facilities will increase the Gordian funding targets if adequate offsets are not identified for closure and demolition. Significant funding mechanisms still need to be secured to execute the new construction outlined in the plan since 63% of the funding for new construction has TBD or Fundraising identified as the funding source.

The 5-year plan includes 18 demolition projects that are expected to cost over \$19M. These projects would remove approximately 340,000 sq/ft and slow the growth of Gordian funding targets by eliminating maintenance and lifecycle renewal obligations. At the same time, removing these facilities could reduce property insurance costs. These removal projects support the Strategic Plan's Commitment 2 – Effective Infrastructure Portfolio – Action 2, Goal 2.1. Currently, most demolition projects do not have funding identified (TBD) and will require fiscal solutions beyond university funding. The largest demolition projects include Dickey-Wood and the Law Building at USM; Hannibal Hamlin, Libby and Murray Hall at UMaine; and Normal Hall at UMPI.

Renovations, renewals and investments in building systems and envelopes constitute 34% of this plan and are critical to preserving and modernizing existing facilities and support Strategic Plan Commitment 2 – Fiscal Sustainability- Action 3 Goals 3.2 and 3.3. When renovations are undertaken, necessary safety and code upgrades are addressed. Based on Gordian's analysis, our planned investments will meet their funding target range for FY24-FY27 and will help keep NAVs steady. This analysis assumes a 6% annual cost acceleration and does not include either the growth in these targets as new facilities come online or the impact of planned demolitions. This planned investment will make a noticeable impact on the facilities targeted, but funding strategies will need to be developed over the coming years since 29% of the planned \$390M investment is TBD funded and an additional 7% is made up of fundraising and unsecured earmarks.

9.1

UMS FY24-28 Capital Plan Performance Against Gordian's Annual Targets

Beyond measuring investment in existing facilities, using a portfolio view of facilities clearly shows what type of facilities are receiving the most funds. Gordian's portfolio view provides a snapshot of the condition of facilities by their function and provides a tool to guide University decision-making. The graphic below shows that across the system, academic facilities and residence halls make up the majority of square footage and are in the most need of investment.

Looking at UMaine System By Functional Portfolio

Comparing the 5-year capital plan against the portfolio view provides insights into strategic priorities and strategies. The graphic below captures the planned investment by facility function and includes non-facility work like athletic fields, grounds, and utility infrastructure projects. Athletic fields are captured under the Athletic category while grounds and utility infrastructure, such as UMaine's energy project, along with projects that span multiple facilities are captured in the Blank category. The athletics projects are the result of the UMS Transforms initiative funded by the Harold Alfond Grant. This same graphic can be found in each university's section.

9.1

Next, non-facility work such as athletic fields, grounds, and utility infrastructure projects are excluded from the graphic, resulting in academic facilities and residence halls receiving the highest investments levels.

To better see how the planned investment aligns with Gordian's targets, new construction is excluded. The result is that academic facilities and residence halls continue to see the largest investments, but athletics drops significantly.

9.1

Finally, to better understand what functions are a priority for new construction, all projects types except new construction are removed. The new academic spaces are primarily the Center for the Arts at USM and the One Health Science building at UMaine. New athletic facilities are exclusively funded by the HAF Grant and associated matching funds.

The FY24-FY28 Capital Plan, can be further understood by grouping projects in cost brackets based on their total estimated cost. These brackets separate at break points where the character of projects – size, complexity of management and funding, and risk – usually changes. As illustrated below, projects expected to cost over \$10M account for 5% of the projects but account for 69% of the capital plan. These projects require enhanced coordination and oversight, and usually need a significant effort to bring together various funding sources to execute. At the bottom of the table, we see that the projects costing \$2M and under account for 82% of the total projects but only account for 11% of the planned expenditures. These projects pose much lower financial risk, but are labor intensive for staff, placing a significant workload on facilities and project management departments.

Cost Bracket	# Projects	5-Year	% total projects	% Capital Plan \$
>\$10M	22	792,764,171	5%	69%
≤\$10M - \$2M	54	232,456,366	13%	20%
≤\$2M - \$500K	82	80,330,331	20%	7%
≤\$500K	255	45,348,753	62%	4%

The FY24-FY28 5-year capital plan is a significant step forward for the system, with a renewed focus on investing in academic facilities and residence halls that will support key strategic priorities to gain and retain students. Because this plan is aspirational, funding will need to be secured in the coming years to fully execute all the identified projects.

UMaine/UMMNarrative:

At the University of Maine and its regional campus at Machias in the next five years of capital and infrastructure investment we will focus on: modernizing aging facilities; expressing our values of sustainability and justice, diversity, equity, and inclusion through building design; and further developing a student-centric teaching, learning, public service and engagement, and research campus. The UMaine and UMM 5-year capital plan will utilize multiple funding sources to strategically address deferred maintenance, update critical infrastructure to maintain the University's R1 status and commitment to excellent learning and living environments, increase space utilization, decrease energy consumption and the use of nonrenewable fuels, and improve athletics and computing and engineering space as per the Harold Alfond Foundation-funded UMS TRANSFORMS initiative. The plan is specifically reflective of the University of Maine System Strategic Plan 2023-2028, Commitment 2: Financial Sustainability and Effective Infrastructure Portfolio. Our planning is guided by the following UMS-SP actions and goals.

Financial Sustainability Actions

Action 3: UMS will partner with the universities and law school to identify and implement by spring 2024 new operational efficiencies leading to cost reductions for each institution in the System.

Goal 3.2: Identify efficiencies in infrastructure, including optimizing the upkeep and use of primary classroom and lecture spaces, meeting and conference rooms, artistic/performance spaces, and public gathering spaces.

Goal 3.3: Identify reductions in energy consumption, including strategic management of underused or unused buildings and offices during periods of peak energy consumption (winter and summer).

Effective Infrastructure Portfolio Actions

Action 1: Develop a system-wide capital plan and priorities for capital investment by May 2024.

Goal 1.1: Address system-wide physical plant needs in relation to other infrastructure needs (e.g. residence hall improvement).

Action 2: Achieve fiscal and energy efficiencies through physical space reduction.

Goal 2.1: Continue to target disused and low-Net Asset Value buildings for removal.

Goal 2.2: Identify multi-use/multi-purpose functionality for new buildings and heavily renovated buildings.

Our capital plans are also grounded in the principles of unified accreditation, as the renovation and building design of classroom and research facilities going forward will take into account the possibilities of the most modern approaches to remote instruction to enable participation of UMS students system-wide in the research and learning opportunities of the flagship.

The University of MaineFinancial Sustainability, Goal 3.2, Action 3.2: Operational efficiencies and optimization of space.

The University will work towards reducing deferred maintenance through the strategic use of grants, Congressionally Directed Spending (CDS), funded depreciation, indirect cost returns, and system funds to renovate spaces across the campus. The University has identified approximately \$85 million in CDS funding that have either recently been approved or are still under consideration. Those CDS proposals, if approved, will help address deferred maintenance while also improving teaching, research, student retention, and community engagement. Additionally, over the next five years the University will increase space utilization and density through space reduction by the removal of more than 150,000 square feet including the East Annex and Libby Hall.

UMaine will begin optimizing space through much needed improvements for teaching and research. The University anticipates bringing forth for approval in the next year the following projects funded by MJRP and/or CDS: Sustainable Aquaculture Workforce & Innovation Center (SAWIC), Blueberry Farm Research & Technology modernization, Sawmill Operations Training Facility, Food Innovation, Industry 4.0, and Nursing Skills lab. Funded depreciation will be prioritized for critical classroom and lab teaching space improvements. Meanwhile indirect cost returns will be invested in research space improvements. Priority projects will be reviewed annually in collaboration with faculty and campus leadership through shared governance,

In the next two years proposals for new and modernized engineering and computing spaces across campus will also be presented to the BOT. Those include the Green Engineering Manufacturing (GEM) or Factory of the Future facility to expand the Advanced Structures and Composites Center, and HAF Maine College of Engineering and Computing (MCEC)-funded renovations across the engineering and computing district. Future renovation projects will include classroom, research, and lab spaces in Boardman, Crosby, and Barrows Halls.

Financial Sustainability, Goal 3.2, Action 3.3: Energy Efficiencies.

The UMaine energy efficiency plan will include the improvement of building systems and envelope, energy efficient fixtures, and the replacement of the steam plant. The University will be replacing HVAC building systems in Sawyer Environmental Research Center and the 1987 wing of Hitchner Hall. The University is also planning to update thousands of interior lighting fixtures to LED light fixtures that will reduce electrical demand. The University anticipates the start of construction of the new central heating plant to replace the steam plant which is near the end of its useful life in the next five years.

Effective Infrastructure Portfolio, Action 1, Goal 1.1: Physical plant needs.

While continuing to focus on our space efficiency, UMaine will invest in critical and strategic physical plant needs. Investment will be made in student housing, athletics, health and life sciences, and teaching and research space.

Student Housing. More than 80% of UMaine's residential housing was built prior to 1975, or nearly 50 years ago. UMaine will launch a study this fall to evaluate student demand and optimum housing mix; conduct a building assessment; develop a renovation, removal or new-build housing plan; and assess funding/financing options, including recommendations of use of internal or external funds potentially through the use of P3s. UMaine anticipates renovating at least one residential building per annum starting in FY26. In FY24 and FY25, UMaine will invest auxiliary funded depreciation in student engagement space and critical deferred maintenance within residential facilities.

Athletics. The HAF Athletics grant-funded project improvements are well underway with the completion of the softball complex in April 2023, the August 2023 completion of the field hockey facility, and the current design of renovations and expansion to the Shawn Walsh Center and Alford Arena. Over the next five years the University anticipates starting design and construction on a new multipurpose arena to be named the Morse Arena, a new soccer stadium to be supported with additional external funding, and a track and field complex, while finishing the remaining roadways and pathways connecting all of the sports complexes.

Health and Life Sciences. UMaine and the University of Maine Foundation are developing a plan to launch our new comprehensive fundraising campaign in FY24. We anticipate additional capital priorities which will come before the BOT, most notably a new health and life sciences building that has been in several prior UMaine capital plans. Given recent legislation directing UMS to undertake a feasibility study for a public medical school, considerations of possible needed space in connection with a new health and life sciences facility will be included.

Teaching and Research Buildings. A key area of concern for the University is the continued degradation of building systems across the campus that have exceeded their useful life. UMaine has building systems that are near critical failure, lacking in energy efficiency and modern control technology. Additionally, according to Gordian, approximately 61% of the University's buildings have not seen a major renovation in over 50 years and for 78% it has been 25 years. While CDS projects and external grants provide funds to renovate specific spaces within buildings, these funds are generally not available for upgrading/renovating the building envelope or building systems. Thus we will continue to invest funded depreciation dollars to match CDS projects to maximize impact.

Effective Infrastructure Portfolio, Action 1, Goal 1.1: Multi-purpose functionality

To maximize use of space, UMaine building design and planning processes will include stakeholders from across campus. The first example of multi-purpose design is the GEM project which is heavily influenced by Maine College of Engineering and Computing faculty and administration, along with ASCC staff. The design team is working to include a "teaching hospital" concept for future MCEC students from across the system, an engagement space for community including K-12, R-1 research space, and adjacent outdoor gathering spaces. This type of deliberative engagement will be built into design processes going forward.

University of Maine's regional campus, the University of Maine at Machias

Continued declining enrollment at UMM presents a challenge as we seek to increase density of space usage. Additionally, once the State-supported bond funds expire, it will be difficult to identify funding for future projects and ongoing deferred maintenance at the campus. Therefore, our emphasis will be placed on operational efficiencies and optimization of space.

Financial Sustainability, Goal 3.2, Action 3.2: Operational efficiencies and optimization of space.

Over the next five years the plan for the University of Maine at Machias is to continue to improve building systems and envelopes and make renovations utilizing remaining UMM state appropriations from FY19. Additionally, we plan to make upgrades to the infrastructure including storm water management, repaving of parking lots and roadways, and walking pathways.

The University plans to make major renovations to the Reynolds Hall basketball court and Murdock Aquatics facility. These two facilities are heavily used not only by the students, faculty and staff at UMM, but also by the community on a regular basis, and are seen by the community as perhaps the most significant benefit available to them from UMM. Note that intercollegiate athletics at UMM was suspended by President Ferrini-Mundy and Head of Campus Dan Qualls effective June 21, 2020. Currently a review of new possibilities for expanded athletic and recreational sports options is underway at UMM, with recommendations expected in end of fall semester 2023/24.

The University plans on increasing density by making arrangements for use of existing spaces by groups external to UMM. This may include the use of office space and utilization of residential buildings for seasonal workforce. UMM is included in the housing study mentioned above.

Finance, Facilities & Technology Committee - 5 Year Capital Plan

Analysis:

UM's 5-year plan includes \$848M in planned expenditures on 116 projects, with an additional \$9.7M for 28 projects at UMM. UM's funding sources include TBD (28%), Fundraising (18%), revenue bonds (15%), HAF Grant (12%) and Earmarks (12%). New construction constitutes 51% of UM's projects, supporting athletic facilities, research, residence halls and academic spaces. New athletic facilities are exclusively funded by the HAF Grant and associated matching funds.

UMM's plan is primarily funded by state capital improvement funds (45%) and general obligation bonds (29%) supporting renovations (43%) and grounds infrastructure projects (24%). Their project to renovate their aquatics center and gym under the athletics facility function is part of the FY24 earmark submission that is still pending.

UMANarrative:

UMA's 5-year capital plan supports key University priorities of increasing enrollment and increasing retention by focusing on the student experience. This plan aligns with NECHE standard 7 and the UMS Strategic Plan: Action 2 and Action 4 Goal 4.2 Commitment 1; Goals 3.2 and 3.3 under fiscal sustainability and Goal 1.1 under effective infrastructure portfolio in Commitment 2; and Goal 3.4 under Commitment 5.

Projects to enhance our Med Lab Tech and Vet Tech programs are underway and will wrap up in FY24. The planned lease and renovation of the Marketplace in FY25 using federal earmarks, if awarded, will create a state-of-the-art space for our Nursing and Cybersecurity programs. The planned construction of a new 81-bed residence hall in FY26, though currently "TBD" funded, is being explored to meet ever growing student demand.

Throughout the plan, a focus on deferred maintenance of buildings with a NAV below 50%, including building envelope (roof and windows) and mechanical systems, will ensure our existing facilities remain comfortable and welcoming. There are also funds allocated for grounds infrastructure projects to beautify the campuses and repair roads, walkways and parking lots to enhance the university's curb appeal. While UMA has several high-dollar TBD or unsecured Earmark funded projects that are important to our goals, we are confident funding can be secured in the coming years through external sources or additional debt if needed.

Analysis:

UMA's 5-year plan will execute \$31.3M supporting 48 projects. The largest funding sources in their plan are TBD (54%), E&G (23%) and Earmarks (17%). The TBD funded projects include HVAC projects in the Katz Library and the construction of a new residence hall. The majority of the earmark funds in the plan are unsecured and would be used

to fund renovations in the Marketplace. The HVAC projects and Marketplace renovations both contribute the academic facility function receiving the most investment.

UMFNarrative:

The capital work on our campus supports key initiatives and are designed to increase NAV and investment in areas to that will help retain students and attract new students. This plan supports UMF's efforts to support NECHE standard 7 and meet several goals identified in the UMS Strategic Plan: Action 2 and Action 4 Goal 4.2 Commitment 1; Goals 3.2 and 3.3 under fiscal sustainability and Goal 1.1 under effective infrastructure portfolio in Commitment 2; and Goal 3.4 under Commitment 5. UMF's 5-year capital plan focuses on moving the needle on deferred maintenance backlog. The campus is undergoing a large Energy Service Company (ESCO) project to renew our HVAC systems that will improve user experience across the campus. With the help of a state capital improvement funds, UMF is making a significant investment to updating the Mallett and Purington residence halls by creating new single user restrooms with updated plumbing and electrical infrastructure that today's students expect.

Over the next five years capital funds has been identified to support the ESCO project, replace roof systems, update campus walkways to be ADA compliant and transform our restrooms in E&G buildings to be user friendly and more inclusive for all. UMF has also requested earmark funds, which combined with other unsecured funds, will improve Prescott Field in order to bring it in line with other Division III programs in the state and conference.

Analysis:

UMF's 5-year plan consists of 38 projects costing \$25.5M in FY24-FY28. State capital improvement funds make up 29% of the total plan and fund critical renovations to modernize UMF's residence halls. TBD and unsecured earmarks constitute 37% of the plan and support UMF's effort to bring Prescott Field up to current collegiate standards. It is this project that creates the spike in athletics related expenditures. Finally, UMF's ESCO project will have a significant impact on both the user experience and NAV of facilities across the campus.

UMFK**Narrative:**

Over the next five years, UMFK will strategically leverage federal earmark funds, state capital improvement funds, remaining Space Reduction Initiative funds, and increasing amounts of operating funds. These efforts support NECHE standard 7 and the UMS Strategic Plan: Action 2 and Action 4 Goal 4.2 Commitment 1; Goals 3.2 and 3.3 under fiscal sustainability and Goal 1.1 under effective infrastructure portfolio in Commitment 2; and Goal 3.4 under Commitment 5.

The Renovation of Fox Auditorium (renovation age 54) will address deferred maintenance and net asset value for our second largest space on campus, and is one of the key Elements of the UMFK Master Plan Report.

Reducing deferred maintenance in the science wing of Cyr Hall will include upgrades to the labs, greenhouse, and vital HVAC upgrades. These labs support the science courses in all of our academic programs as well as academic research projects. Our faculty research and facilities provide opportunity not only for UMFK students, but provide a base for summer research projects for undergraduate and graduate students from other campuses as well.

Our vision for the next five years includes increasing density with a multi-faceted approach to attracting outside groups to campus. An agreement to contract with Sodexo for conferencing is already in place, and we are in the exploratory phase of other initiatives. The underlying key to preparation for all of these is updating the residence halls. The Lodge needs HVAC upgrades, including installation on the second and third floors. Powell Hall needs room and restroom renovations, including the addition of single-user restrooms. Crocker needs room and hallway upgrades, as well as a continuation in the upstairs lounge of the very well-received student-led renovations which occurred in the downstairs lounge.

Areas of concern which are addressed in this five-year plan but for which funding has not yet been identified include HVAC in the Lodge, key card access campus-wide, and deferred maintenance/programmatic needs of Haenssler House.

We continue to thoughtfully match opportunity with need, and will be developing more plans for deferred maintenance and space reduction as well as increases to density, net asset value, and revenue generation.

Analysis:

The University of Maine at Fort Kent plans to spend \$10.6M on 26 projects valued at over \$14M over the next 5 years. Earmark funds constitute 38% of UMFK's 5-year plan, state capital improvement funds 23%, E&G and TBD funding 19% each, and dedicated systems funding 1%. The \$4M renovation of Fox Auditorium dominates the overall \$5.7M investment in the academic facility function and the renovation project category. UMFK also plans to spend \$2.5M on their residence halls.

9.1

UMPINarrative:

UMPI's 5-year capital plan centers on initiatives designed to enhance our campus environment in order to attract and retain in-person students. Significant investments are planned in the dining facility and residence halls to meet our students' needs and grow enrollment. These investments align with NECHE standard 7 and support UMPI meeting goals outlined in the UMS Strategic Plan: Action 2 and Action 4 Goal 4.2 Commitment 1; Goals 3.2 and 3.3 under fiscal sustainability and Goal 1.1 and 2.1 under effective infrastructure portfolio in Commitment 2; and Goal 3.4 under Commitment 5.

UMPI has applied for earmark funding to renovate the Gauvin Center and bring our athletic field up to current collegiate standards; both initiatives will enhance the student experience and strengthen our community ties.

Grounds, utility infrastructure and building system projects in this plan provide a critical foundation for all our projects. Because the 5-year plan is aspirational, we have several projects that don't yet have funding secured. We will continue to work over the coming fiscal year to identify funding opportunities and adjust our project timelines and priorities as necessary.

Analysis:

UMPI plans to spend \$30M on 55 projects over the next 5 years, with over half of those funds identified as TBD and almost 30% in unsecured earmarks. The two proposed earmark funded projects are for the renovation of the Gauvin Center in Wieden Hall and to build an artificial turf athletic field. The \$10M Gauvin Center (\$4M earmark and \$6M TBD) drives the investment in academic spaces whereas the turf field drives the spending in the athletic category.

9.1

USMNarrative:

USM's 5-year capital plan supports the University's mission of staying student-focused every day and is directly tied to key initiatives that will improve enrollment and retention. This plan focuses on completing the vision of the Portland campus created in the Master Plan through the construction of Portland Commons, the McGoldrick Center, and the Center for the Arts. This plan also aligns with the UMS NECHE Standards¹ and Strategic Plan².

This plan includes revitalization of the residence halls on the Gorham campus. In addition, significant investments are planned for the University's academic spaces to create an enhanced learning environment. These include the Center for Teacher Excellence, the Dubyak Center, and a new E-Sports arena. Additional projects focus on lowering deferred maintenance on a priority and need basis in Mechanical, Electrical and Plumbing (MEP) and Envelope systems to improve the student learning environment and staff working comfort in academic facilities on all three campuses.

Because the 5-year plan is aspirational, there are several projects where the funding source has yet to be identified. Two such large projects are the removals of Dickey-Wood from the Gorham campus and the Law Building from the Portland Campus. Both projects are important to USM's overall appearance and will take a significant investment that is beyond USM's current fiscal capability. A thoughtful and creative approach to funding will be required if these projects are to be executed.

9.1

Analysis:

Over the next 5 fiscal years USM will spend \$194.6M on over 90 projects primarily focused on academic space and residence halls. New construction (34%) is centered on completing construction of Portland Commons, McGoldrick Center, and parking garage and starting construction on the Center for the Arts. The Center for the Arts project both drives the amount of fundraising dollars anticipated (14%) and the large investment in academic spaces. The completion of Portland Commons, and future work on the residence halls on the Gorham campus are the bulk of the investment in residence halls at USM. USM's plan is made up of 32% TBD projects, which include work in both academic spaces and residence halls, along with the demolitions of the Law Building and Dickey-Wood.

9.1

Maine LawNarrative:

In FY24-FY25 the Graduate & Professional Center located at 300 Fore Street intends to replace the failing RT Units that control the HVAC System for two floors of the building. At the same time, the roof membrane and building envelope study will be done to determine any and what work should be completed to remedy the leaks that the building currently experiences on bad weather days.

Additionally, we will be enlisting the services of a sign designer and work with the City of Portland to get new signage approved and installed on the external facade of the building. Inside the building, there are a few small flooring matters to work out on the first floor and some lighting and AV/Sound System that needs to go onto the first-floor stage area for events. There are a few classrooms that need technology installed so they can be utilized for hyflex teaching. Finally, some of the classrooms need to be outfitted with more multifunctional furniture and teaching lecterns that will accommodate both MBA courses and JD courses.

As a single facility that has recently undergone an extensive renovation, Maine Law does not anticipate any extensive capital needs beyond FY25 for 300 Fore Street at this time. We will work with Gordian and other experts to determine lifecycle replacement requirements to inform future capital plans. Furthermore, we will need to assess the needs and develop capital projects for 7 Custom House moving forward. is executed, there will be a need for capital projects to renovate the space to support the planned use and address anticipated building systems and envelope issues.

9.1

Campus	Facility Name	Project Name	Short Description	Project Type	Funding Source	Total Estimated Project Cost	FY24 Budget	FY25 Budget	FY26 Budget	FY27 Budget	FY28 Budget	5-Year Capital Plan	Facility Function

						\$1,075,000	\$	\$25,000	\$	\$50,000		\$	1,075,000

Analysis:

Maine Law's Capital Plan is focused on making necessary improvements to 300 Fore Street, with most of the work focused on the building's envelope and systems. All of the projects are funded by State Capital Improvement Funds.

FY2024-FY2028 Capital Investment Plan

BACKGROUND:

At the July 10, 2023 Board of Trustees meeting, it was requested that Vice Chancellor Ryan Low take a deeper look at the Multi-Year Financial Analysis for the University of Maine System with the Finance, Facilities and Technology Committee. Vice Chancellor Low will provide a brief presentation to the Committee at the August 23, 2023 meeting.

AGENDA ITEM SUMMARY

NAME OF ITEM: Deering Farmhouse Renovation Revenue Allocation, University of Southern Maine

INITIATED BY: Roger J. Katz, Chair

BOARD INFORMATION:

BOARD ACTION: X

BOARD POLICY:

701 – Budgets, Operating, & Capital

UNIFIED ACCREDITATION CONNECTION:

N/A

BACKGROUND:

a. Summary of the request

The University of Maine System, acting through the University of Southern Maine (USM), previously received authorization from the University of Maine System Board of Trustees to expend up to \$2,000,000 to renovate and relocate the historic Deering Farmhouse located on the Portland campus at its January 2023 meeting. The project was to be funded with University E&G funds including \$65,000 from FY22 and \$500,000 from FY23 with the remainder being budgeted in the FY24 and FY25 capital plans. With the approval in January 2023, the board asked the University of Southern Maine to explore alternate funding methods to University E&G funds, such as philanthropy and/or historic preservation resources. The Board also requested that USM return for further authorization before exceeding the funds approved from FY22 and FY23 totaling \$565,000. The project is currently under the approved amount of \$565,000.

The University is seeking authorization to expend an additional \$750,000 in University E&G resources to fund the next phase of the Deering Farmhouse project. This will enable the construction of the Center for the Arts (CFA) project to proceed and to stay on schedule since the structure is in the current footprint of the new CFA building. Because of escalating construction costs, the University currently plans to move and weatherize the structure. The University plans to delay the interior renovation until a later date.

b. Overall requested budget and funding source:

The overall approved budget of this project is \$2,000,000

Initially the project has been funded by University E&G funds including \$65,000 in FY22 and \$500,000 in FY23. USM is requesting that an additional \$750,000 be utilized from the FY24 capital funds. Any additional funds will be determined at a later date.

- c. **Confirmation of whether the project was included or reflected in the Master Plan, Long Term capital plan or 1-year capital plan most recently approved by Trustees.**
The Deering Farmhouse Renovation was not specifically identified in USM's FY24 Capital Plan but funds are available for this project.
- d. **More detailed explanation of rationale for project and metrics for success of the project (ROI or other):**
Work being completed as part of the farmhouse relocation, specifically site utilities, will have a beneficial effect on the CFA project, thus reducing the sitework costs of that project.
- e. **Explanation of the scope and substance of the project as needed to supplement (a) and (d) above.**
N/A
- f. **Changes, if any, in net square footage or ongoing operating costs resulting from the project:**
N/A
- g. **Budget for the project and further elaboration on funding source and selection as needed to supplement (b) above):**
The overall budget of this project is \$2,000,000 and will be funded by University E&G funds. A study for this project was funded in FY22 for \$65,000 and an additional \$500,000 were budgeted in FY23. The newly requested \$750,000 will be funded by University E&G and are budgeted in the FY24 Capital Plan. Any additional funds will be determined at a later date.
- h. **Alternatives that were considered to meet the need being addressed by this project:**
This project preserves a historic structure currently unsuitable for use due to deferred maintenance and modernization needs for renovation at a later date, and it provides proximity to the proposed CFA.
- i. **Timeline for start, occupancy and completion:**
The design is complete with sitework and preliminary construction activities beginning in June 2023. The move of the building will be completed Fall of 2023. Completion of the full project will be determined at a later date when funding is identified and approved.
- j. **Timeline for any further consideration or action anticipated to be needed by the Board or its committees regarding this project if full authority is not being requested from the outset.**
Authorization of additional expenditures to complete the project.
- k. **Additional information that may be useful to consideration of the item.**
N/A...

TEXT OF PROPOSED RESOLUTION:

That the Finance, Facilities, and Technology Committee, approves the following resolution to be forwarded for Board of Trustee approval at the September 10-11, 2023 Board Meeting.

That the Board of Trustees accepts the recommendation of the Finance, Facilities, and Technology Committee, and authorizes the University of Maine System acting through the University of Southern Maine to add \$750,000 in University E&G resources to the Deering Farmhouse Renovation project.

University of Maine System
Board of Trustees

AGENDA ITEM SUMMARY

NAME OF ITEM: Deering Farmhouse Renovation, University of Southern Maine

INITIATED BY: Dannel P. Malloy, Chancellor

BOARD INFORMATION:

BOARD ACTION: X

BOARD POLICY:

701 – Budgets, Operating & Capital

UNIFIED ACCREDITATION CONNECTION:

N/A

BACKGROUND:

a. Summary of the request

The University of Maine System, acting through the University of Southern Maine (USM), is requesting authorization to expend up to \$2,000,000 to renovate and relocate the historic Deering Farmhouse located on the Portland campus. The renovated space in the building will be used for the office of the Director of the Osher School of Music and associated administrative space. The building will also house the music library for the Osher School of Music as well as general related storage.

The Deering farmhouse is the last remaining structure from the Deering Estate in Portland and dates from 1807. It is the only historically significant structure on the Portland campus and is in an inactive and degraded status. This project reactivates and preserves this structure while providing complementary functional space to the adjacent Center for the Arts (CFA). The University has received praise and support from the City of Portland Historic Preservation office as well as the Greater Portland Landmarks for the foresight and incorporation of this project into the overall site development.

b. Overall requested budget and funding source:

The overall budget of this project is \$2,000,000 to be funded by University E&G funds. This request is pursuant to Board of Trustees Policy 701 which requires projects with a total cost of more than \$500,000 to be considered by the Board of Trustees or its Finance, Facilities and Technology Committee. In this case the Committee's recommendation will be forwarded to the Full Board for consideration.

c. Confirmation of whether the project was included or reflected in the Master Plan, Long Term capital plan or 1-year capital plan most recently approved by Trustees.

The Deering Farmhouse Renovation is identified in USM's Capital Plan

d. More detailed explanation of rationale for project and metrics for success of the project (ROI or other):

The cost of this project per square foot is approximately \$750 square feet. Similar space, if it were included in the CFA, would be approximately \$1400 square feet. In addition, adding the space to the

1/19/2023

11.1

13

CFA would put the building over a square footage threshold which would require additional features for fireproofing and changes in building materials. These requirements would have added significant cost to the CFA project. Work being completed as part of the farmhouse relocation, specifically site utilities, will have a beneficial effect on the CFA project, thus reducing the sitework costs of that project.

e. Explanation of the scope and substance of the project as needed to supplement (a) and (d) above.

N/A

f. Changes, if any, in net square footage or ongoing operating costs resulting from the project:

N/A

g. Budget for the project and further elaboration on funding source and selection as needed to supplement (b) above):

The overall budget of this project is \$2,000,000 and will be funded by University E&G funds. A study for this project was funded in FY22 for \$65,000 and an additional \$500,000 were budgeted in FY23. The newly authorized funds will be budgeted in the FY24 and FY25 capital plan.

h. Alternatives that were considered to meet the need being addressed by this project:

Renovation and reuse of the Deering Farmhouse is the most cost-effective option for obtaining the necessary space identified as outlined in section d above. This project preserves a historic structure currently unsuitable for use due to deferred maintenance and modernization needs, and it provides proximity to the proposed CFA.

i. Timeline for start, occupancy and completion:

The design is complete with construction to start March/April 2023 and expected completion in Summer 2025.

j. Timeline for any further consideration or action anticipated to be needed by the Board or its committees regarding this project if full authority is not being requested from the outset.

No further consideration is anticipated at this time

k. Additional information that may be useful to consideration of the item.

N/A

The Finance, Facilities and Technology Committee approved this item to be forwarded to the January 29-30, 2023 Board of Trustees meeting, for approval of the following resolution:

TEXT OF PROPOSED RESOLUTION:

That the Board of Trustees accepts the recommendation of the Finance, Facilities and Technology Committee and authorizes the University of Maine System, acting through the University of Southern Maine, to expend up to \$2,000,000 to renovate and relocate the Deering Farmhouse located on the Portland campus.
