## SUMMARY

### **Coronavirus Update (David Demers)**

David shared a timeline of Coronavirus related events that have transpired since last month. Things have evolved and continue to evolve from the announcement of readiness planning that was sent on February 28. UMS is doing everything possible to minimize the impact to staff. Additional guidance for employees will be released by Friday, April 3. Based on the interpretation of new guidelines, there will be no change in how essential employees are classified and additional restrictions on travel will be in place.

### **ITSS Inter-Campus Collaboration (Mike Cyr)**

David shared kudos to Mike for his leadership and guidance during this process. Mike shared that this has been a team effort and he is very appreciative of the hard work put in by all. ITSS put together a COVID-19 Contingency Team to work on unifying support services to support *anyone from anywhere*. A unified schedule and support hours will be provided and support services will be shared between areas. Challenges with the phone system have been identified because it is dependent on staff being on campus. A live chat support system was quickly initiated as an alternative way to offer support and use of that system is growing. All online information and notification processes are being updated. Folks are really coming together and have stepped up!

### **Web Technologies Communication Efforts (Tiff Maiuri)**

The Web Technology folks were called upon to help stand up the Health Advisory site. Tiff shared that the site was initially developed to be a simple, one page subsite to keep COVID-19 health advisories and guidance links to resources. As that development quickly escalated, all campuses pitched in and came together. Banners were added to extend to all campus websites and portals. Subsections and functionality for time stamps were added. During this time, Web Tech also completed the design of the Presidential Tour Site at [values.maine.edu](http://values.maine.edu) and have started developing a new subsite to demonstrate UMS's contributions to the State of Maine's effort to combat COVID-19. David Rosen also helped the IT Help Desk roll out Live Chat. Web Tech staff have kept late hours during weekdays and weekends, as needed. Additional support was provided by Cathy Caron and Angel Allen. Tiff shared thanks to all that have supported the Web Tech folks during this busy time.

## **Networkmaine VPN and K-12 WiFi Efforts (Jeff Letourneau)**

Jeff shared an update on VPN access timeframes. Things have progressed very quickly since planning discussions began on March 4. VPN was determined to be a critical need and was put in place quickly. An easy to use, scalable with split routing, certificate based authentication was needed and a huge support lift would be required to make it happen. A dashboard was created to allow the support team to review connection history. New licenses were acquired by March 12, internal testing was completed by March 14 and an announcement of availability was made on March 19. It took ten days to set it up! There are currently 1,097 device profiles created with over 917 unique users. Peak usage hit 362, which is 36% utilization, and is growing daily. As of today, there have been no problems and the system is performing as expected. Improvements and updates to the support dashboard are being made to help the teams taking support calls/emails/chats. Very few tickets have been escalated. Jeff thanked all the groups and teams for their help including the SAs and support services staff. Jeff was very pleased Ray's work to make this a usable solution.

Jeff also provided an update on the K-12 "study from car" initiative. Networkmaine manages the networks for schools across the state and remote learning has become an issue for some as not all students have internet access. Most schools do not have guest networks turned on as a default. This would allow wifi to be available outside of the building. On March 20, Networkmaine reached out to 136 empty schools to set up their guest networks. A map of these sites has been created and allows for others to promote availability across the state. There are currently 147 areas across the state that are allowing outside access to wifi. This includes 91 K-12 schools, 17 universities, 38 libraries and 1 other location. Jeff thanked Jason McDonald for the wifi configurations and Andrew Henry, Tyler Ruttingher and Ken Curtis for handling requests and updating the map.

## **RemoteLab Access (Aaron Gagnon)**

Aaron shared that because access to computer labs on campus would be constrained during this time, there was a need to broker connections to these machines and their special software. A decision was made on March 13 to find a product that would allow this access. A list of software needed was developed and product reviews took place. RemoteLab was selected as a workable option and the service was in place by March 27. The software available via RemoteLab continues to be built upon. EUT had help from many teams during the collaborative process. The DCO, ITSS, Networkmaine, SAs, DBAs all contributed.

Steven added that we have been collaborating with other universities using the application and that usage is building. Steven also thanked Tiff and Calvin for being the second set of eyes.

## **Blackboard and Zoom Activity for Remote Teaching/Learning**

### **(John Brown)**

John provided an update on the increased usage of some tools and others that had to be spun up quickly. Zoom usage has increased significantly. Service has been stable overall as Zoom adds capacity daily to meet demand. John thanked Angela Cook for updating information on the support page in Confluence and for helping to pull together teams to work on issues. Over the last 30 days there was a peak of over 5,000 meetings last week. This is about 10 times the number of meetings being held in Zoom over the same time last year. Meeting minutes and participant numbers are also significantly increased.

Kaltura numbers have also increased and they have also added capacity to assist with increased traffic. There have been some issues with slowness and availability, but no real problems overall. Spikes last week and this week hit over 8,000 plays. Minutes viewed have also gone up.

Blackboard has also increased with no reported service issues. Usage spiked last week with about double the activity seen prior to spring break. Labster (virtual science laboratory simulation) and Respondus (remote proctor) were added for faculty use. Both of these software integrate with Bb.

John thanked Glenn Eichel, Brian Pomeroy, Floyd Goodell and Justin Hafford in SDS for supporting these tools and for scrambling to work on these things while continuing work on the Brightspace Implementation.

David shared his thanks to Procurement for adjusting their procedures to allow for quick responses in acquiring these tools in short order.

### **Kudos**

To Web Technologies from the UMS Board of Trustees Chair (via Dan Demeritt) for the comprehensive public health advisory site.

To Mike Cyr from Lauren DuBois to Mike Cyr for an amazing job leading the support services teams through the collaboration effort.

To the entire IT team from Jim Thelen for impressive work in trying times.

To Chris Thibault from Ray Soucy for work and contributions during the USM power outage and setup of the Sullivan Gym shelter.

To Kayla Stromvall and the help desk team for quick assistance getting a docking station set up to work from home.

## **Q&A**

Any questions can be sent to David via email.

#### Chancellor Malloy: Celebrating Commencement During the COVID-19 Pandemic

1966.2020

UMS Colleagues –

Our core mission is to transmit and expand knowledge through our teaching, research, and public service to the State of Maine. When our faculties confirm that a student has met the requirements to earn an academic degree in a particular field of knowledge, we joyfully celebrate with commencement exercises, caps and gowns, and colorful academic regalia, all rooted in centuries-old English academic tradition. Honoring these traditions in our own times is a noteworthy rite of passage to which our students rightfully look forward as each academic term nears its close. That these celebrations of academic achievement should occur is beyond question.

And yet, none of us could have foreseen even just a few weeks ago how the sudden onslaught of the global COVID-19 pandemic would make celebrating these traditions in the normal sense a serious threat to public health. It is with a sober sense of responsibility that our Presidents and I have therefore decided that we cannot proceed with our planned in-person commencement exercises in early May.

I want to be very clear, though: All UMS universities and the Law School will be awarding degrees on schedule and recognizing the academic achievements of our graduating students. While traditional in-person commencement exercises are not possible during the pandemic, each university will determine an appropriate alternative celebration that balances the need to protect public health with the joyful recognition of our students' academic aspirations and achievements.

Our universities will be communicating directly with their students over the next two weeks about planning for alternative commencement celebrations.

Knowing the disappointment that comes from having to communicate this difficult decision, I'd like to share, in closing, an uplifting reflection on the very best of what we do in higher education. The following poem was written by John Masefield, Post Laureate of the United Kingdom from 1930-1967, for the 1946 inauguration of the Chancellor of the University of Sheffield in the aftermath of World War II. To paraphrase Masefield below, our work to bring thought into the world goes on, and we will celebrate the academic achievements that come from it, pandemic or not.

# Updates

- **UMS Coronavirus Response**

- **Remote Work**

- **Extending Remote Work through May 17**
- **Update on Guidance for Employees to be published by Friday 4/3**
  - **Sick Leave time flexibility & Federal relief guidelines**
- **Examples**
  - **Any employee, including faculty, traveling to campus due to preference or non-essential accommodations should eliminate such travel**
  - **Employees that must go to campus for work should minimize time spent there.**
  - **Nearly all travel is prohibited; travel via carpool or rideshare for official university business is prohibited.**
  - **Exemptions from 3/24 directive remain in effect, including communications and technical staff required to maintain business continuity**

  - Mike Cyr

The screenshot shows the 'Support' page of the University of Maine System. At the top, there is a navigation bar with links for 'Apply', 'Give', 'Careers', 'Portal', and a search box. Below this is a secondary navigation bar with links for 'News', 'Universities', 'Students', 'Faculty & Staff', 'Trustees', 'Data & Policy', and 'Offices'. The main heading is 'Support', with a breadcrumb trail 'Home > Support'. A search box is provided. The page is organized into several sections:

- Information Technology:** A dropdown menu with options for 'Support', 'Update Account Information', and 'Tools Resource Guide'.
- Training:** A dropdown menu with options for 'Security/Privacy', 'IT News & Updates', 'Reports & Newsletters', and 'About Us'.
- IT Help Desk:** Includes a 'Chat Now "NEW"' button, a 'Submit a Service Ticket' link, and the email address 'help@maine.edu'.
- Support Hours:** Lists the following hours:
  - Monday – Thursday 7:30 am – 10 pm
  - Friday – 7:30 am – 8 pm
  - Saturday – 10 am – 8 pm
  - Sunday – 10 am – 10 pm
- Contact Information:** Identifies the 'Office of Chief Information Officer'.
- IT Support Center:** A logo for the 'University Services Technology Support Center' with the tagline 'Your front door to Information Technology' and the phone number '800-696-4357'.

At the bottom right, there is a link for 'Technology Support Home'.
