

**REQUEST FOR PROPOSAL
#2019-01
Higher Education Parking Garage Management Solution
Addendum #02**

CLARIFICATION

Vendor site visit scheduled for October 23, 2018 from 2:00 – 4:00 pm EST

Please confirm your intention to attend

Deadline for Proposal submission: November 2, 2018

QUESTIONS

1. As P2PE is a requirement do you require EMV credit cards?
Answer: These are different requirements. P2PE uses encryption technology to protect data of cardholders (our customers) and reduces networking requirements. EMV is the standard that requires chip technology in the card to limit use of fabricated cards and reduces the liability of the merchant. If the bidder proposes using a University merchant account then EMV is required as well.

2. Can you confirm replacing all existing safety loops is required?
Answer: They should only be replaced if there is an issued with the age of the loops. They appear to be working currently.
