REQUEST FOR PROPOSALS # 2022-004
Engineering & Computer Science Components
RESPONSE ADDENDUM #1
July 15, 2021

QUESTIONS

Q1: I see that in section 1.1.4 Specifications / Scope of Work it says "objective of this RFP is to form contractual relationships with vendors in the engineering and computer science component space who can support Jaegger punch-out catalog integration and streamline the purchasing process for our end users". Exactly what is the Jaegger punch-out catalog and what type of components are contained therein?

A1: Jaegger is a software company that integrates company's online purchasing platforms with our internal purchasing platform. Jaegger is a services company and would facilitate this integration. The company or companies we are seeking to contract with would sell a wide range of components used for engineering and computer science research and teaching.

Q2: Regarding 1.1.4 Specifications / Scope of Work is there any additional information you can provide on what specifically you may be looking for? Is it just anything regarding engineering and computer science? We are unsure exactly what the school system is looking for.

A2: The University is looking to form contractual relations with companies that sell a wide range of components used for engineering and computer science research and teaching.
