

REQUEST FOR PROPOSALS #2026-119
UM Food Innovation Lab
RESPONSE ADDENDUM #3
August 5, 2026

CLARIFICATION

Vendor question: "Item #OV, the Rational combi ovens, are shown as natural gas, 480/60/3. This combination does not exist. The amps shown on the Electrical Schedule would reflect that the unit is electric and not gas, but the BTU gas load reflects that the unit is gas.

Which is correct?"

Answer: The University would like pricing for both models, 1) Rational Combi Oven ICP 20-Full Natural Gas model, 208/240 1 Phase

and 2) Rational Combi Oven ICP 20-Electric 440/480V, 3 Phase.
